Present Immigration Law Provides Change in 1927 on President's Decree

WOULD SUBSTITUTE

Provision Is Not Mandatory and House Leader Says In-

provision in the law for a reappor tionment on a basis of national origins in 1927, shall become opera-

According to Albert Johnson (R.) Representative from Washington, and chairman of the House Immigration Committee, this is one of the outstanding problems in immigra-tion policy before this committee. Section 11 of the 1924 law provides a new basis for apportionment of alien quotas, and would reduce the total annual influx from 164,667 to 150,000. Two bills to nullify this provision have been introduced and will probably be the subject of com-mittee hearings.

will probably be the subject of committee hearings.

"The problems before the committee are still many and intricate,"
Mr. Johnson said. "The passage of the Immigration Restrictive Act in 1924, by no means settled the problems which have confronted the United States along immigration and naturalization lines for 25 years or more.

Inquiry to Precede Action

"The 'national origins' plan for the prorating of 150,000 quota immigrants according to the origin of the people who have made the United States since the beginning is to go into effect July 1, 1927, provided the President issues a proclamation on the recommendation of three Cabinet officers-the Secretaries of State, officers—the Secretaries of State, Commerce, and Labor—if they can agree upon a statistical statement which shall serve as a yardstick for the prorating of the proposed limited immigration. You will notice the statement just made by me contains a 'provided' and an 'if'; and we may all be assured that these two qualifying words will cause extensive hearings and much inquiry during the winter session."

A sharp division of opinion is expected to develop in Congress over the provision in the act to change the existing quota arrangement in

the existing quota arrangement in 1927. Under the present system, the annual quota of any nation is fixed at 2 per cent of the number of immi-grants from that nation residing in the United States in 1890. Under the national origins provision, the total the United States in 1890. Under the national origins provision, the total annual influx would be limited to 150,000, the quotas to be determined upon the proportionate numerical strength of nationalities among the whole population of the United States, according to the 1920 census. The change is ordered to be made only on proclamation by the President on or before April 1, 1927, based on a report made tot him by the Sectionies of State, Commerce and Lagrange of State, Commerce of retaries of State, Commerce and La-

According to Mr. Johnson, a comerts under this joint committee is already at work com-piling the necessary data. Existing

ABYSSINIA'S PLEA TO LEAGUE

Recent Anglo-Italian Pact

By Cable from Monitor Bureau | border, directed to developing Italian

LONDON, July 31-The British

Democrats of Massachusetts are holding an outing this afternoon and tonight at the Bass Point House, Nahant, and active workers in the party are gathered there from all over the State. David I. Walsh, former United States Senator, and now a candidate for re-election, and Col. William A. Gaston, proposed by the party organization for Governor, were to speak, but it was doubtful, it was said. If Colonel Gaston could be present.

Added interest in the outing is taken because the filing of nomination papers for Colonel Gaston give official stamp, to his candidacy for the nomination for Governor by his party.

The outing is being held under the auspices of the Democratic State Committee of which Charles H. McGille of Lynn is chairman. The committee held a meeting early this afternoon and then the members met the party workers.

Filing of nomination papers by Thomas D. Lavelle now places him on the list of active candidates for re-election as representative in Econgress from the fourteenth Massachustts district. has filed his papers.

John F. Fitzgerald, former mayor WELCOMED BY GREAT BRITAIN Government Desires Full Discussion of Issue Arising From

LONDON, July 31—The British Government welcomes Abyssinia's application to the League of Nations calling attention to the Anglo-Italian pact, a representative of The Christian Science Monitor learns, and desires a full discussion of this subject, which is to be brought up in the House of Comomns on Monday.

The British case is that the pact has been entered into solely to facilitate the negotiations with Abyssinia for utilizing Tsana Lake for irrigation purposes in Egypt and the Sudan. This lake is the source of the treaty made in 1906, whereby zones of influence were recognized in Abyssinia, that of Britain being in the west, that of Italy in the south and that of France in the east. The pact has been regrifing its nature.

The opposition parties here, for example, make it the ground for an attack upon the British Government, alleging that it amounts to exploitation by two powerful nations of a weaker neighbor. The Conservatives answer that there can be no question of a harrage this water can be not the sudant and that of France in the east. The pact has the source of the sudant and that of France in the east. The pact has the source of the east. The pact has the source of the sudant and that of the source in the east. The pact has the source of the sudant and that

stands of the fourteenth Massachusts district, has filed his papers.

John P. Fitzgerald, former mayor of Boston, formally opened the Democratic state campaign on Cape Codlast night when he spoke for the candidacy of Colonel Gaston.

The Democrats this afternoon discussed favorably the declaration of Daniel England, former Mayor of Pittsfield, that he is a candidate for the party nomination for the state treasurership.

Among the Republicans the announced candidacy of Charles E. Wright of Pittsfield, district attorney of Berkshire County, for the Republican nomination for Representative in Congress from the first district is discussed today, Mr. Wright will thus contest for the nomination with the present long-time Representative, Allen T. Treadway of Stockbridge. On the other hand, by the construction of a barrage this water can be
made of the utmost value farther on
in its course to render fertile a large
area now desert in British Sudan,
where the population is rapidly increasing, also indirectly farther off
to supplement irrigation in Egypt.

Extension of Treaty

The fact is designed to terminate
Italian competition over the concesscion Great Britain desired to obtain
from Abyssinia to develop this project. Italy thus undertakes not to cppose the Twans irrigation scheme
while Britain in return agrees not to
stand in the way of Italian railway
enterprise on Abyssinia's southern

To Help Abyssinia applied to join the league its entry was
opposed by Italy, while Britain was
inkewarm. At that time, however,
the question was still in dispute as
to what extent Abyssinian can the virigation dealt with in the
present pact.

Answering Opposition questions in
the House this week, Godfrey
Locker-Lampson, Foreign Undersecretary, said: "We hope to be able
to show the Abyssinian Government
that this work (the Tsana barrage)
will serve the interests of Abyssinia
as well as the Sudan and Egypt."

EUROPEANS LACK AMERICAN NEWS. EDITOR ASSERTS

Institute of Politics Hears Plea for More Adequate Reports on United States

By a Staff Correspondent

WILLIAMSTOWN, Mass., July 31

On the ground that the "American news" carried in European papers generally deals with "Hollywood, railroad wrecks or gunmen," Arthur S. Draper, assistant editor, New, York Herald Tribune, told the institute of politics today that Americans get more and better news of Europe than Europe gets of America.

Europe gets of America.

Partisans of Great Britain at the ratisans of Great Britain at the institute and critics of American newspapers promptly took issue with the leader of the open conference on "Public Opinion in World Affairs."

Declaring that British papers have recently criticized the United States for being "Woofully ignorant of

for being "Woefully ignorant of European affairs," Mr. Draper asked: "What does Europe learn about us from its press?" it has heard about Ellis Lsland, about rum row, about Hollywood, about Senator Borah's views on the League and debts, about lynchings, about prominent divorces.

lynchings, about prominent divorcess and gunmen, about railroad wrecks. "Only a few foreign correspondents stationed in this country confine their dispatches to reports of the serious problems; but the rest of them are under instructions to send so-called 'human interest' items on the ground that Europeans are not interested in highly involved American politics

American News of Europe

"These correspondents do not send one-tenth as much American news as we receive from Europe. Britons have been so interested in their own affairs and the problems of Europe that they have paid little attention to us until quite recently. All I desire to bring out is that the American public has a better opportunity can public has a better opportunity to learn what is going on in Europe

Home-Made Fears WHEN it is realized that it usually speaks ill for a child's environment for him to be fearful, parents surely will set their little ones better examples. A useful article dealing practically with the subject of substituting courage for children's fears will appear in

Causes and Effects of Mexican Controversy Briefly Summarized

By the Associated Press Below is given a summary of the religious situation in Mexico: CAUSES

Laws become effective July 31, enforcing the Constitution of 1857, reaffirmed by the Constitution of 1917. These regulations provide:
No foreign elergymen may function in Mexico.
Church ownership of property is forbidden.
All church property reverts to the state.
Religious instruction in schools, convents, and monasteries is

It is illegal for clergy or religious periodicals to criticize the Gov

Mexican episcopate ordered as a protest discontinuance of all services in which 25 000 priests function, beginning July 31.

Some 10,000,000 Roman Catholics will be unable to receive sacraments, except baptism and matrimony, which will be given by laymen. The church planned to have lay committees hold some 12,000 churches, but the Government ordered that they be taken over by committees named by the Mayors.

Exceptagitatical property other than churches, is closed under some

Ecclesiastical property, other than churches, is closed under seal.

Economic boycott has been ordered by organized Roman Catholic laymen. Purchases will be limited to necessities. Troops have been called out at various places to maintain order.

GOVERNMENT'S ATTITUDE

Church and state must be separated and the church must eschew politics. President Calles regards it as "a final struggle" between "light and darkness."

CHURCHES ATTUTUDE

CHURCH'S ATTITUDE Persecution is threatening religious freedom. The church denies it has meddled in politics.

Methodist Bishop Denies Mexico Persecutes Church

Says Religious Laws Apply to All Creeds and Advises "Hands Off" Policy for United States

CHAMBER BACKS

on Measures to Rehabili-

tate French Finances

Special from Monitor Bureau NEW YORK, July 31-A denial hat the Mexican Government is engaging in religious persecution and strong plea for the United States o keep hands rigidly off in the trial of strength between Mexico and the Roman Catholic hierarchy were made in a statement on the situation

made in a statement on the situation by the Rt. Rev. George A. Miller, resident bishop of the Methodist Episcopal Church in Mexico, issued through its Board of Foreign Missions in New York City.

Recounting the history of the rehations between the Roman Catholic church and the Mexican and other Latin-American governments, the bishop's statement concluded with the view that, "take it all around, Mexico is in the best condition of its entire history, and the present government is heroically making good progress toward economic reorganization, agricultural reconstruction, successful policing of the country and the extension of popular education. What Mexico needs from the United States," It is declared, "is simply an intelligent sympathy and a moral support."

Is which goes into effect January
1. These rates, under the law, most be promulgated by September 1 of this year but previous to that time, the State Insurance Department with meet with the representatives of the rate bureau of the insurance companies to make adequate adjustment of the charges to be made as premiums.

Under the circumstances, officials connected with the state insurance department are withholding any public statements regarding the probable effects in behalf of the public which are expected to show visible results after the law has become effective.

STATE POLITICS

SPEEDING UP

SPEEDING UP

That the compulsory liability insurance law was framed for the protection of the public and to make the highways safer for all classes, in declared by men thoroughly conversant with all phases of the situation in this state to be a fact which the many public hearings decided.

Better Safety Conditions Seen

Political Activities Charged
"The reason is that the Roman Catholic priests in Mexico have openly refused to comply with the law of the land and have persistently meddled in politics. They have now organized an economic boycott, with the openly avowed purpose of bankrupting the country, and thus defeating the present administration. How long would the United States tolerate the presence and activity of such propaganda?"

The bishop declared that in all Latin American countries in which the Roman Catholic Church had obtained control, intolerance and persecution "was visited upon the followers of other faiths," and that the

tion of the national floating debt, it was revealed today.

The Premier considers that such a procedure is the only way to preserve the existence and functioning of a sinking fund from the vicissito of a parliamentary regime and preserve it from changes which the Chamber might be tempted to does not support it or who belongs to effect by the passage of ordinary bills.

The Covernment has decided to

the Chamber might be tempted to effect by the passage of ordinary bills.

The Government has decided to raise the interest rates on national defense bonds from five per cent to five and a half or six per cent beginning August 1. The action will be taken to cut down on the number of bonds being presented for reimbursement.

By SISLEY HUDDLESTON

By Special Cable

PARIS. July 31—Methodically and cautiously Raymond Poincaré, the Premier, is preparing hig plans and hudgetary proposals, which will be forced through Parliament merely as a preface.

In conversation with a member of the Government, the correspondent of The Christian Science Monitor gathered that there was a possibility of André Tardieu, who is the righthand man of M. Poincaré, as he was of Georges Clemenceau, being sent to Washington during September. No definite decision will be taken, but it is certain the suggestion has been made to M. Tardieu, who reserves his reply, By his missions in America.

The Com's greatest strength is in Mexico City, the federal district, the esaports and the industrial centers.

The Monitor coursepondent further learns that the attitude of the Government has decided to rained the policy.

Demonstration Planned
A great demonstration as evidence of support of the Government's policy is to be held tomorrow by the Gupport of the Government's policy is to be held tomorrow by the confederation of labor. Parties in the Congress, which control the Chamber of Deputies and some senatorial groups and sowersment member of the Government employees. The confederation, which claims a membership of 1,350,000 is the action of Labor. The electron of labor is called are the General Confederation of Labor, embodying the self-styled "Rod" group, and the reilroad workers' unions, which maintain an industrial decision on vital aspects of the debt agreement, no better choice could be made.

The Monitor coursepondent further learns that the attitude of the Gov.

MEXICO EXPELS ENVOY OF POPE; COUNTRY QUIET

Deputy Papal Nuncio Has 48 Hours to Leave-Presence Is "Inconvenient"

GOVERNMENT SEALS CHURCH PROPERTY

Little Disorder Reported as Officials Take Charge of Treasures and Buildings

By the Associated Press MEXICO CITY, July 31-Monsigor Tito Crespl, in charge of the Roman Catholic apostolic delegation in Mexico City since the expulsion of Monsignor Cardana, the papal nun-cio, has been ordered expelled from the country. The order came at the direction of President Calles because the Government considered his pres-ence in Mexico "inconvenient."

Monsignor Crespi was given 24 hours to depart, but on intervention of the Italian Legation the time was

extended to 48 hours.

Throughout the Republic of Mexico Government agents are closing or preparing to close all Roman Catholic offices and structures except actual places of worship, giving the Government control over all store-

nouses of church valuables.
Attorney-General Ortega personally attended and supervised the closing of the archbishop's offices

here. Señor Ortega's orders for the Gov-Roman Catholic Church in these countries had opposed every struggle for political freedom, for democracy and popular education since the beginning of the nineteenth century. He declared, also that he believed the requests for withdrawal of the American embargo on shipments of arms to Mexico came from sources infinical to the Government and should not be granted.

CITAMDED DACKE

Government to Guard Churches.

The Government says that the ac-POINCARE PLAN is for the purpose of guarding them during the present uncertain period. It says that it is the intention to turn over all such property to citizen committees, which will succeed priests as custodians of the churches as soon as the committees are in-stalled. Vote of Confidence Given

PARIS, July 31. (P)—The Poincaré Government today got its first vote of confidence on its financial measures to rehabilitate French finances. The vote was 256 to 173 in favor of the first article, raising the tax on the transportation of wine.

M. Poincaré intends to convoke the Senate and Chamber as a national assembly, sitting at Versailles, instead of at Paris, to vote a special

After forcing their way through the people and successfully performing their mission of closing the annexes, the officials proceeded to other churches, Señor Ortega personally supervising their work.

Que problem yet to be solved will come up when the priests turn over their buildings and other property to committees appointed by the priests, and has ordered committees named by the mayor of each town to take over the church.

Churches to Be Transferred The church of St. Catherine's was

Churches to Be Transferred It is certain that the priests will turn over the churches to some com-mittee today—but whether the priests' or municipal committees will have control, is yet to be seen.

The last day of services in the churches of Mexico witnessed ex-traordinary scenes of religious emo-tion on the part of communicants. In

tion on the part of communicants. In the capital thousands of Roman Cath-olics visited their churches or

Dispatches report that quiet pre-vailed yesterday in Morelia, Oaxaca, San Luis Potosi, Celaya, Saltilio and Queretaro. As these are extremely religious cities and there were no constitutional law for the creation been express the belief that no trouof a sinking fund for the amortizables of consequence are likely to oction of the national floating debt, it
was revealed today.

The Premier considers that such these places

a strike and close any establishment, whether workshop, store, factory or business, employing a non-Crom man Thus the Crom is a very powerful influence, and, although it contains numerous Catholics, there has been no indication that its policy in support of the Government has been

weakened for that reason.

Services were suspended in the churches yesterday at various hours, ranging from as early as 3 p. m. to 8 or 9 o'clock, but in all cases the suspensions left would-be worship

pers unaccommodated, Secretary of the Interior Tejeda is quoted by El Universal as saying that the priests ceasing religious services will not be allowed to resume until they comply fully with the Government's requirements regarding re-ligious affairs. This means that the priests would have to register with the municipal authorities, give in-

Free Entrance to Be Had

The newspaper quotes the secre-try as saying: "The public will tary as saying: "The public will have free entrance to the churches and surely will be more open to con-version without the priests than with them, because in their preachings the latter have always pursued no other objectives than satisfy their material interests and obtain political con-trol which does not belong to them."

Reports from the outside indicate that feeling is much less intense in some sections than in Mexico City. In Puebla City feeling is better, and the Archbishop is said to have ap-pealed to all Catholics to avoid violence and attempt to effect amendment of the Constitution by legal means, "thus fulfilling their duties as sons of the church, and citizens."

Description of government business while abroad, it was officially stated.

Mr. Mellon possesses no authority

Government Claims Property The Mexican Government, in taking charge of the property of Roman Catholic churches, claims, as it has claimed for many years, that the jewels and treasures and all prop-erty within church buildings, as well as the real estate and buildings

themselves are and have been the property of the federal government for more than half a century.

This claim is made by virtue of the reform laws and the Constitution of the reform war period, which for-bade the church to own property in Mexico and declared all church property confiscated and reverted to Gov-ernment ownership. The present Constitution of 1917 repeats the declaration that all church property be

longs to the Federal Government.

The Catholic authorities never have admitted the Federal Government's claim to title to church property. Al-though at various times during the past six years much Catholic church property has been diverted by the Government, no efforts had been made for some years literally to en-force the constitution on this point.

Based on Constitution buildings, grounds, jewels and other a statement by the Department of properties, the title to which for 60 Commerce. has been constitutionally vested in the Government.

Neither the Government nor church headquarters here possess anything approaching exact knowledge of the value of Catholic proporties throughout the Republic. In consequence of the 10 years revolution and the five years reconstruction period there has been no complete census of church belongings "The importance of the construction has also had its effect, and the last four years have seen single industry."

"The importance of the construction industry ties of the advantages of seasonal construction has also had its effect, and the last four years have seen successively larger building programs as a result.

The division of building and houseledges the construction industry it is stated, "has construction has also had its effect, and the last four years building programs as a result.

The division of building and houseledges the construction industry." taken. One reason why the Govern-ment demands an inventory from every Catholic priest when they leave their churches is said to be the hope that it will obtain a satisfactory estiof the value of church property

Arms Embargo to Mexico Will Not Be Removed,

President's Spokesman Says PAUL SMITHS, N. Y., July 31 (P)

—The presidential spokesman has revealed Mr. Coolidge's opinion that the embargo on arms to Mexico will not be lifted, that aviation is still too costly for extensive commercial use, and his assurance that Andrew W. Mellon, Secretary of the Treasury is in Europe solely for a vacation.

In view of the present religious situation in Mexico, it was said, President Coolidge does not expect that any action will be taken in the near future toward lifting the embargo on arms to that country, which has existed for a year and a half. Mr. Coolidge has discussed the question with Mr. Kellogg several times, but they never reached a conclusion.

tion with Mr. Kellogg several times, but they never reached a conclusion.

The President feels that there is every reason to expect that the future will see passengers and certain types of merchandise being carried by air, although at present that aspect of commercial flying is regarded by him as rather more of an expectation than an accomplishment, due largely to the expense of aerial transportation. Mr. Coolidge does not anticipate

on flying was given as a result of the visit he had earlier in the week with Edsel Ford, head of the aviation department of the Ford interests, who discussed the subject thoroughly with Mr. Coolidge.

Although the Chief Executive was said to be optimistic as to the future of the airplane in commercial life, it was said in his behalf that he regarded attempts to predict the future of any new industry as futile. The ridicule heaped upon the telegraph and telephone in their early days was recalled as an example of the inade visability of the efforts at forecasting future industrial developments.

Mr. Mellon's visit to Europe is for recreation only and the head of the Treasury Department will transact

The Federal Government has ordered stores to cease selling arms and ammunition of any kind during the crisis.

Mr. Mellon possesses no authority as secretary, it was pointed out, to negotiate debt agreements with the three or four nations whose small obligations to this country have all the crisis. obligations to this country have not yet been funded. One of his brief purposes in leaving the country was to visit his daughter who is in Rome.

The visit of Senator Cameron (R.). Arizona, for a brief stay was under-stood to be a social call. Mrs. Frank W. Stearns of Boston, wife of the will arrive next week to join her reports reaching here show.

that there will be a very large pas-senger service for the present or Coolidge.

Many-Efforts Reported Made

for Lifting of Arms Embargo WASHINGTON, July 31 (A)-Mexican Embassy officials said they had no information that the Washington Government contemplated any change in its embargo policy, any they expressed concern as to the result if the barrier were re-moved while disturbed conditions prevailed south of the border.

It was intimated in official quar-ters that the State Department has been under continuous pressure for some time to lift the embargo. It was imposed in 1924, when the De la Huerta revolt was at its height for the announced purpose of assist-ing the constitutional authorities in Mexico City in maintaining themselves against the De la Huerta revolutionists. It was a supplement to the even more direct aid given the Mexican Government about the same time through the sale to it of rifles, machine guns and military airplanes from the surplus stocks of

the War Department.
Aside from the disturbances over religion there have been no serious revolutionary disturbances in Mexico since the De la Huerta movement was crushed. Rumors of impending revolts against the Calles régime have of Boston, wife of the been in constant circulation, however, close personal friends with little to confirm them so far as

MINERS FAVOR PEACE PROJECT

British Church Leaders' Proposal for Settlement Approved by Federation

By Cable from Monitor Bureau LONDON, July 31-The Miners' Federation delegate conference has recommended that the coal field unions accept the church leaders peace memorandum, which suggests a return to work for four months on the April terms of state aid during this period, the reappointment of the royal commission to work out a def-lnite scheme of reorganization and a wage revision and arbitration on matters relating to the reorganiza-lion and wage reductions if the owners and men fail to agree.

South Wales and Durham delegates trongly opposed and Herbert Smith and A. J. Cook as strongly defended change of policy on wage reduc-tions. Mr. Cook made a surprising and much belated admission that the miners must face the facts." The conference against declared its unqualified opposition to the owners terms on the eight-hour day basis The owners' association, on the other hand, maintains its refusal to als and no attempt to renew negotia ions is in sight.

Opinions on Plan Vary

The miners' officials contemplate a nto September if not later and express the hope that the mission to America will obtain sufficient funds meet the cases of acute hardship in the coal fields and so make it

Christian leaders calling themselves the "industrial Christian fellowship" able answer. who have encouraged the miners to suppose a solution to their problem the men's delegates have now acepted-a scheme based upon further prolongation of the state subsidy.

The Rev. Alfred W. Gough, presendary of St. Paul's Cathedral, says

m an interview: "This intervention is only prolonging the dispute beause it is based on sentiment witht reason. . . . My opinion is that churches will be well advised to lissociate themselves as soon as as the full truth his troubles started. cossible from a struggle about which hey know little more than the man n the street. Sentiment is the last juality that ought to figure in a po-

"Interfering Parsons" The Rev. William R. Inge, dean of Paul's, is equally outspoken. He is today: "I have expressed my ppinion that the church should not

neddle in matters of this kind." An article by Dean Inge appears tomortow, and is featured in today's Daily Express with the red seven-column heading, "Interfering parsons."
In this connection, the Morning Post says: "To support a scheme of settlement which is acceptable only to one side and would lead to the bankruptcy of the other cannot pos-

sibly lead to peace, but might quite probably prolong the struggle and worsen the lot of the miner."

worsen the lot of the miner."
The Manchester Guardian, on the other hand, which approves the icheme, describes as an "immense idvance" the miners' decision yesterlay to accept it. "It means," it says, "that old obstructing formulas are thandoned. . . . the miners' executives have now learnt their lesson and if the miners in the coal fields. and if the miners in the coal fields lollow their lead this grave obstacle to peace will disappear."

for yourself, church or friend

translated this minor fact into an "earthquake." Sir Frederick urged the formation of a "school of head-

line writing" as a corrective to such incidents in the American press. The working of public opinion in England defeated the general strike, said Sir Frederick. However, the power of massed finance upon jour-nalism in England, he said, has served to diminish the diversification of British journalism and chaused "organs of public opinion" ir' re "purveyors of news." The contractor many newspapers by one man is a major factor in reducing the number of independent papers.

Political Power Minimized

From 1900 to 1914, Sor Frederick recalled, the overwhelming number of English newspapers were Con-servative, whereas the nation as a whole was overwhelmingly Liberal. Denying therefore that the press is the essential factor in molding public opinion, as stated by Mr. Draper, he declared "the political platform" is a greater influenc. "Give me the platform, and I will give you the press," he said. In recent days the radio threatens both the "platform"

and the press.

More than ever the development of the radio threatens along with newspaper amalgamations to concentrate the molding of public opinion in the hands of a few people.

Dr. Moriaz J. Bon, German publi-cist and financial authority, said he is frequently asked to write special articles for the Berlin press, but he doubted whether his articles have much influence in molding opinion. People read such economic articles rather out of curiosity and for their own amusement, than to make up pletion of the present supply. For

Facts, Not Arguments

Not arguments, he said, but facts, and the repetition of facts are likely to influence public sentiment. Shall possible to maintain resistance.

Meanwhile a strong difference of or what they ought to know, is the most difficult problem for every edection of those bishops and other itor, he said. A judicious mixture of the two is perhaps the most accept-

W. B. The Irish settlement was finally forced, he claimed, by world public opinion, mobilized by a few

Mr. Draper said in part:
"Propaganda reached its highest state of perfection during the Great War, but the moment the propa-gandist began to put out half-truths If the word propagandist is now shunned, we have in its place the titles of 'publicity agent' and 'public grounds: many' recent specific barrelations counsel.' With the change in titles has come a refinement of

"The phrase 'herd mind' is no important subject."

Or. A. Mendelssohn-Bartholdy, longer a fair characterization of the American mind. Our newspapers differ greatly on important questions.

Mr. Draper said there is much less muck-raking today than there was 20 years ago.

American Newspapers Numerous In 1925 there were 2293 daily newspapers and 13,383 weeklies in the United States and the aggregate circulation of the dailies was 35,753,000 or a copy for about every third person in the country, he said.

"The American press is an im-mense national asset," he concluded. "It is far from perfect, but it is an

"It is far from perfect, but it is an independent press, virile, reflective generally of the country."

Dr. Charles K. Leith, professor of geology at Wisconsin University, and mineral adviser to the War Industries Board in the World War, declared the "closed door" policy of certain nations toward their national resources is rising "to a point dangerous to peace," and called on the United States to join with the British United States to join with the British Empire or with Latin America to formulate a world wide "open door

policy.' States to collect funds to help the niners and their wives and families in the walkout.

Miss Wilkinson, interviewed, said the had only had 50 minutes in which pack her things but said the har things but said the her things but said the sai

"Closed Door" Policies

Introducing his address, Dr. Leith said: "Outside the United States the opportunity for the free development of national resources has been recently closed to an extent little realized by the public. The actual result of the closed door situation is considerable international friction and irritation, which in certain cases rises to a point dangerous to peace. Mexico and Morocco are points in case.

"The reason for this is that the opportunity for the from the first cattle would perish.

"Suspended as a result of the Government's cattle quarantine. The correspondent of The Christian Science Monitor learns that 150,000 animals, including 10,000 camels and sheep, seasonally migrating to Egypt from Syria, have been stopped near the Palestine frontier.

Wahabi camelteers came to Jerusias to permit the caravan to move in its accustomed course, saying that otherwise the cattle would perish.

Helping to Solve Problems of New Citizens

tutions, but in order to avoid uneasant circumstances, possible retion, and to secure a cloak to keep away prying eyes from their real attitude toward the United States.

Desire for Expression Ever since the league was started in 1913 we have maintained this atcome to realize that there is an inherent desire in the person of nearly every immigrant to become a political

strong Conviction

"Now, what I want to say to you with the strongest words I can find or a strong conviction is this:

"That every inch of territory and every living soul you take away from Germany in the west, on the Rhine, means not only that Germany is made so much poorer and smaller and more difficult to live in—things you might well have fully intended to happen to your enemy—but it means that the Germany which remains and still holds the central position in Europe and therefore one of the central positions in the world is changed to the very core, the balf ance between its own stock of true German being destroyed to the loss of the former and as I think to the world's loss too.

"For in this eastern Germany there will remain much of the energy and all the discipline of eld, the spirit of never give in, the thrift, the loyalty to their leader, and the grim determination to retain the old superiority of the ruling class over the mass of the Slavs."

every immigrant to become a political part of our Government. All that is needed to bring it forth is a proper urge, the right kind of friendliness. There has been sufficient opportunity in our experience in helping between 1500 and 2000 aliens every month of the year for us to determine this fact."

Already a preliminary survey has been made in three schools, one the Seward High School at Hesser and Essex streets on the lower east side, another the Theodore Roosevelt High School with its four annexes scattered through the Bronx and the Bronx. Each of the first two schools had 23 nationalities represented among its pupils and the third school had drawn from 21 nationalities. In all 10,000 parents of 39 nationalities were reached coming all the way from Argentina to Wales. The league acquired some preliminary statisties showing the percentage of naturalization between the different racial groups but not on a sufficiently large scale to warrant conclusions.

PALESTINE HOLDS UP

Difficulties Adjusted In addition the organization was told of cases of exploitation in citizenship and other ways, which were adjusted. In one case money was SALES CO., 44 Brombeld St., Mass.

was said to have guaranteed delivery

by the children, and who will offer aid to those parents who wish to become naturalized.

Discussing the work. Harold Fields, executive director of the league, said:

"The primary purpose of the campaign is to invite the attention of our aliens to the advantages and obligations of citizenship and, where they indicate a desire to prepare, for it, to afford them the means of securing it. Citizenship that is forced is an unfaithful and dangerous weapon. It only creates a cross-section of our population that secures its citizenship papers not with love and appreciation for our institutions, but in order to avoid untable to specific the united States Constitution.

In these ways the 8000 members of citizen receives a souvenir copy of the United States Constitution. In these ways the 8000 members of

the organization seek to carry for-ward its object, "To encourage, aid-and instruct people of foreign birth to become citizens of the United States and to spread the message: America, the land not only of oppor-tunity but of reciprocal obligations."

in 1913 we have maintained this attitude toward our work. We have NEW QUOTA PLAN TO BE STUDIED

(Continued from Page 1)

quotas shall continue if the procla-mation is not made on the specifier quotas shall continue if the proclamation is not made on the specified date.

"If must be clear that, upon the adoption of the 'national-origins' provision by the Senate and House conferees in 1924, consideration was given the possibility that the ascertainment of 'national origins' might not be feasible, and this language was employed to provide authority for the continuance of existing quotas in such a contingency." Mr. Johnson said. "It follows, therefore, that notwithstanding the mandatory terms apparently requiring that national origin quotas be determined, and that report be made to the President, and requiring also the issuance of a presidential proclamation, the new quota basis may not become effective at all."

MOTH PROTECTION

Today~ and every day: Real values in shoes

Price comes last. It's never a measure of value.

Coward Shoes are honestly made-honestly sold. No skimping of choice leathers nor substitution for skilled workmanship. Never a foot poorly fitted just to sell a pair of shoes.

And so we price them honestly. We ask enough to maintain our own rigid standards of quality. And because we sell so many shoes we can sell them at prices really low for their

You pay what they're worth—they're worth what you pay. And that's the way intelligent people buy.

Shoes of Quality Since 1866 for Men, Women and Children 270 Greenwich Street, New York City

Mr. Johnson expressed the belief that the two years' operation of the 1924 act have shown its value to national welfare beyond a doubt, and pointed to the fact that reduction of the influx of aliens by 50 per cent is leading to a more homographic. leading to a more homogeneous popu-lation and maintenance of American standards of living.

"The effects of the 1924 act upon migration the world over have been positive," he asserted. "Its benefits to the United States have been so marked as to confound those who opposed its enactment. Its administration has been accomplished with an ease and smoothness unparal-leled and unexpected. It deserves no important criticism from any who think in terms of America's wel-

"that the immigration act of 1924 is not an exclusion statute, except in so far as it applies to persons of Oriental race. The act merely wiped out the privilege ac-corded Japan under the 'gentlemen's agreement.' It created no discrimination against the Japanese. On the other hand, it did away with the discrimination heretofore existing against Orientals other than Japaagainst Orientals other than Japanese on a plane of equality with their fellows of the Far East. We now exclude with equal fairness all the yellow races. That this is just and equitable and consonant with sound national policy cannot be disputed by any who fully appreciate the problems of the United States.

"The intent of the ferware of the

"The intent of the framers of the Immigration Act of 1924 was that it should, in a measure, restore the racial balance of the people in the United States. In the framing of the United States. In the framing of the law, it was deemed essential that people of a kin like unto those founding fathers whom we delight to honor should be favored over others whose advantages in the world have been less. This is not to say that the more backward peoples are undesirable. We have not excluded them, and we shall not."

HEREFORD BISHOPRIC MARKS ANNIVERSARY

Bu Cable from Monitor Bureau LONDON, July 31-The twelve hundred and fiftieth anniversary of the Hereford Bishopric, whose majestic

Hereford Bishopric, whose majestic cathedral is on the banks of the Wye in Herefordshire, was celebrated yesterday. A vast gathering of prominent churchmen, public officials and laymen took part.

Dr. Leslie Henson, Bishop of Durham, in a sermon, cited the little known but historically correct similarity between the position of the church, in the seventh century and now. He said Muhammadanism in that century—a powerful, organized, aggressive, enthusiastic and utterly hostile influence—was similar to the strange movement roughly described as "Communism, which is now carry-ing on an eager, subtle, unresting in 1929.

BOSTON TO ASK FOR ESTIMATES ON SNOW PLOWS

City Will Spend \$546,000 on Machinery-Advertisements Next Week

One week from today it is planned to insert advertisements in the Boston City Becord, the official municipal weekly publication, asking for bids for snow-removal apparatus, which, it is approximated, will cost about \$546,000, which has been made

available for the purpose.

Preparation of the specifications for the snow loaders, the motor driven dump carts, tractors, plows of various designs and scarifiers are now being drawn by the engineers employed in the Department of Pub-lic Works under the close super-vision of James H. Sullivan, commis-

sioner of the department.

It is planned to have these plans and specifications ready for prospective bidders following the publica-tion of the advertisements. Delay in the preparation of these various speci-fications will, it is said at City Hall, postpone the formal request for bids for the equipment next week.

Urges Prompt Action

Louis K. Rourke, building commissioner of Boston and former commissioner of the department of pub-lic works, an engineer of many years experience in various large undertakings, as chairman of the emergency committee of city officials which Mayor Nichols drafted last March following the period of unusually severe snow storms, at the last meeting of the committee, ex-plained to his colleagues Mayor plained to his colleagues Mayor Nichols' insistence that no time be lost in advertising for the equipment and the preparation of specifications so that the bids of the various manu-

facturing concerns receive ample study and comparison. "I believe that the bids will be advertised in next week's City Record, said Mr. Rourke today. "The public works engineers will probably be far enough advanced with their specifications and blue prints by that time.
Then we should be ready to open all
bids late in August.
"If the contracts are awarded early

in September that time will be none too early. The importance of what Boston is doing in the way of being forehanded in this matter of acquiring snow-removal equipment is rea-lized by the city's large commercial and industrial concerns as well as by the engineers of the Boston Elevated with whom we will be in better shape to co-operate in clearing the streets than ever before.

New York Making Plans

"New York is preparing for emergencies in the future through the expenditure of millions of dollars this year for the purchase of snow removal equipment, whereas Boston will probably not expend a

half-million.

"In the original report to the Mayor made last March by the emergency committee, we called for 60 five-ton automatic dumping trucks. After further study of the necessities of the emergency we are to meet, the committee has decided to purchase seven-ton trucks, thus largely increasing the total capacity of cial assistant to the vice-president increasing the total capacity of cial assistant to the vice-president of the equipment when the stress will

livan, is to supervise each step in the purchase of this emergency equipment. The supply department will submit the advertisements to the committee before they are printed done before the train pulls into the supply department will show the supply department will show the supply department will show the supply department will be supply department. and we will also examine the specifi-cations prepared by the public works journey. Mr. Bacon has spent nearly

ts annual convention, the program opening Tuesday evening with a re-ception at the Hotel Vendome and continuing through Saturday. Thomas P. Jones, manager of the Harvard Club, is president of the organization.

JUNE BUSINESS SHOWS DECLINE

But Cotton and Wool Trade on Up Grade, Says Federal Reserve Report

By the Associated Press New England business activity during June was at a lower rate than during May, the monthly review of the Federal Reserve Bank of Boston said in its issue of today. "The de-cline, however, was smaller than the cline, however, was smaller than the declines reported in either of the two previous months," the review said. "The New England business activity index, which makes allowances for the annual seasonal fluctuations in production and the volume of trade, was slightly lower in June than a year ago, and nearly 10 per cent lower than the average for the first three months of 1926. "For the first time in three years

there was no decline in consumption of cotton by New England mills in June, as compared with May. Furthermore, consumption in June this year was larger than in the corresponding months of the last two years. Sales of cotton goods at important mill centers improved con-

siderably in July."

The report said that the same was true of wool consumption in June. although this industry was not as active as the cotton. "The shoe industry of New England," the review went on, "is the third of the major industries in the district to report a larger volume of output in June than in May for the first time in three years and a higher rate than

than in May for the first time in three years and, a higher rate than for the corresponding month of either of the past two years.

"Production of paper by New England mills has been declining steadily since last April, following a decline in the volume of orders which began about the first of Enhyment and came about the first of February and came to and end early in June. The building industry is very active . . . , but the volume of contracts awarded in New England during June declined more than the usual seasonal amount and was below the volume of a year ago. In the first three weeks of July, further, fewer contracts were

"Commodity prices have fluctu-ated within narrow limits since last April, a slight rise in June being practically offset by a decline in the first three weeks of July. Notwith-standing cooler weather than usual, New England department store sales were but slightly less than the larg-est June sales on record. Daily aver-age sales of the Boston department stores during the first three weeks of July were approximately 10 per cent larger than in the corresponding period a year ago. Although there period a year ago. Although there has been some strengthening in money rates during the past three months, there has been hardly any change in the rates for loans for commercial purposes, the increase affecting mainly rates on loans se-cured by stocks and bonds."

NEW BUICK MODELS ARE BEING SHOWN

Improvement to 1927 Series Cut Motor Valuation

Many people were attracted today to the Noyes-Buick company show-rooms in Boston and other Buick agencies through the United States by the first showing of the Buick motor car models for 1927. Smoothness, quietness, and freedom from vibration are qualities claimed to have been achieved to a new degree in the new cars. A "vacuum ventilator" for the crankcase, which draws off oil-diluting vapors so that comoff oil-diluting vapors so that com-plete changes of motor oil need only be made four time a year, is another

counter-balanced crankshaft A counter-balanced crankshaft mounted on four bearings, connected to lighter weight pistons, is said to do much toward eliminating period vibration in the motor. In addition, the motor employs a new device called the torsion balancer. This absorbs the tendency of the crankshaft to twist under the power impulses and delivers these power impulses back to the shaft after the

RAIL MEN 'REST' IN WAGE APPEAL

Petitions Will Be Laid Before State Arbitrators Monday

State trustees and other officials of the Eastern Massachusetts Street Railway Company will begin on Monday morning placing before the board of arbitration the petition of the car operators of the road for an advance "For the first time in three years in wages, their reasons for declining

> At the hearing yesterday afternoon, which closed the employee's side of the case, Albert S. Richey, professor of street railway engineering at the Worcester Polytechnic Institute, ex-plained the make-up of his index of street railway wages. He said a wage should be measured by its purchasing power.

> Answering a query by James H. Vahey, attorney for the employees, Mr. Richey stated that if the wage rate of Boston Elevated were left out of his index, it would tend to lower the index because the increase in wages on the Elevated has been greater than the increase of the in-dex. This testimony followed the line of argument of Arthur C. Wadleigh, state trustee of the railway, who on a previous day contended that inclusion of rates in large cities, where wages have increased more than in smaller cities which were comparable with those of eastern Massachusetts territory, tended to make the index higher than it otherwise would have been.

The next witness was a one-man car operator in the Brockton dis-trict. He testified as to his home life and habits. He said he arises July, further, fewer contracts were awarded than in the corresponding period last year.

"Commodity prices have fluctuated within narrow limits since last about a slight rice in June being day. He testified that he works seven day. DAIRY INDUSTRY EXPANSION URGED AT FARM CONFERENCE

Professor Frandsen Says New England Can Cope Successfully With Western Competition-Cheap Pastures and Nearby Markets Are Aids

ings about competition from the milk producers of the West, Prof. J. H. Frandsen of Massachusetts Agricultural College said to the conference of dairymen at the Farm and Home Week just closed here. He talked on "Western Milk Competition and Ways of Meeting It."

Existing freeth, rates on milk.

Existing freight rates on mid-western dairy products give New England dairymen a marked advantage, he pointed out, especially since about 90 per cent of the United States' food products are consumed in the big cities or near the eastern

"Hence with our cheap pastures rather plentiful supply of hay, good dairy climate, with good cows and careful attention to efficient market-ing, Massachusetts dairymen should have no particular trouble in meeting western milk competition," Pro-tessor Francisco said.

Seek Agricultural Program farmers work out a constructive ag- monthly index of the bureau of comricultural program, one that will put their agriculture on a more perma-nent and profitable basis, the speaker believed. The grains and

AMHERST, Mass., July 31.—New plus milk during seasons of over-England dairymen can and should expand their production and distri-bution of milk without any misgiv-tween the co-operative associations production; to develop a better and more sympathetic understanding be-tween the co-operative associations of the east and the west; and to de-

velop good clean herds.

Among the other talks made at the dairyman's conference were a discussion of "The Betterment of Permanent Pastures" by Sidney B. Haskell, director of the Massachusetts Experiment Station, and an outline of "Modern Types of Dairy Buildings" by Miner J. Markuson of the Department of Agricultural Engineering, Henry Jeffers of the Walker-Gordon Dairy Company, Juliustown, N. J., told how alfalfa improved milk

BOSTON'S JUNE TRADE BETTER THAN EXPECTED

Business activity in Metropolitan Boston during the month of June was greater than in May and "on the whole was greater than was gener-In fact, New England may well einterested in helping the western ally looked for," according to the mercial and industrial affairs of the Boston Chamber of Commerce. Industrial activity of June compares

speaker believed. The grains and feeds produced in the west are basic for industry and agriculture as a whole. A prosperous middle west is an advantage to New England, he said.

The trend is toward a greater consumption of dairy products everywhere, said Professor Frandsen. Last year New England doubled her consumption of ice cream, an increase that required milk products equivalent to that used in the manufacture of 10,000,000 pounds of butter.

To meet this increased demand, he

Pietermaritzburg Meeting Passes 7 Resolutions in Condemnation

NATIVES OPPOSE

COLOR BAR BILL

DURBAN (Special Correspondence)—The passing of the Color Bar Bill by a joint session of both Houses of Parliament in Cape Town has roused a great deal of adverse feeling in the Union, especially in the Province of Natal, which contains a dominantly native population. In evidence of this a native mass meet-ing was held on the Market Square in Pletermaritzburg, at which the following resolutions were passed:

 That this mass meeting of na-tives, composed of all classes and all stages of civilization, assembled on the Market Square, Maritzburg, on the Market Square, Maritzburg, on Sunday afternoon under the auspices of the Natal African Congress and the Industrial Commercial Workers' Union, herewith begs to proclaim its protest against the action of the Government in forcing through the Color Bar Bill, to our very greatest regret and entire disappointment.

2. That this meeting feels that the present Government is not conducive to the welfare of this coun-

try so far as we have been following it up in their individual speeches and also in Parliament; but, be that as it may, the natives have an equal claim for consideration.

3. That this meeting expresses its heartfelt thanks and congratulates the leader of the Opposition (General Smuts) and the missionaries for the life-and-death fight they manifested, which showed that they and they only are the true servants of God and the fathers of the natives and guardians of South Africa.

4. That it is not true that the missionaries and others who fought for us in this particular bill are misleading us. We are quite aware of the consequences of the Color Bar Bill and the intentions of the legislators of the same from their own lips.

5. That that the Prime Minister.

5. That had the Pame Minister agreed to a deputation composed of natives only being heard at the bar of the House, he and his supporters would have heard the views of the natives themselves, and the idea that they have been missed by the missionaries and others would have been cleared to the present Government. That this meeting, therefore,

humbly prays and earnestly appeals to our only true father, our beloved King, through the Governor-Gen-eral of South Africa and supreme chief over the native population not to give his assent to this fearful bill. to give his assent to this fearful bill.

7. That these resolutions be for-warded to the secretary to the Gov-ernor-General, the Prime Minister, the Chief Native Commissioner, Natal, General Smuts, and the Bishop of Cape Town, and others who fought for us.

The Northern Heavens

By EDWARD SKINNER KING

for August Evenings ing our observations, to recapitulate the first-magnitude stars now visible: Vega, Deneb, Altair, Arcturus, Antares, Capella and Fomalhaut.

The study of this cloud of galaxies widens our view almost indefinitely. Proceeding from our little earth to the mighty sun; sizing up the galactic system of which our sun is so

insignificant a member; then scan-ning the spirals, flecking the sky ike airplanes, we now have the vision

as of a squadron of maneuvering air-

planes, the Coma-Virgo system of galaxies at a distance of 10,000,000 light years. Some day we may find even numerous aquadrons of spirals forming a still higher plane of stel-lar organization.

August Meteors

August Meteors

Comet discovery this year has not been prolific, as in 1825, which was remarkable in the number of comets sighted. During August, although there may be no comets, we shall have traces of a comet in the so-called August meteors. Seeming to radiate from the constellation Perseus in the northeast, they are called Perseids. They are the debris straggling along the path of ap old comet discovered in 1862.

An occasional member of the group may be seen throughout the month, but the maximum display occurs about Aug. 10. Entering the earth's atmosphere, they burn with a yellow hue as they traverse the sky at a moderate velocity. Somutimes they leave a train of luminous vapor behind them.

The Constellations

By EDWARD SKINNER KING

Professor of Astronomy at Harvard Observatory

A LL the stars we see in the sky, even when we use a telescope, belong to our own stellar system. Grouped in a discold form, they spread out to merge into the star clouds of the Milky Way. The arrangement is like a thick old-fashloned watch. The galaxy marks the periphery, seen projected against the depths of space. Hence, the brightness in star magnified stars are blended into the luminous band of light which we call the Milky Way, the frontier of our galactic system.

Baturn and Jupiter are the bright planets of the evening. Sature is in Libra, and Jupiter is near Caprious. The latter is in opposition with smaller instruments, show the nebulæ on such a condensed scale that their images are comparable to the Sun on Aug. 16, when it supplier is most easily recognized by its great brilliancy, outshining all the starry host. Mars, as shown on initudes proved feasible. A comparing midp, rises later, so with other material gave the color-character of each, which in general proved to be sun-color, the luminous band of light which we call the Milky Way, the frontier of our galactic system.

Youth of World Answer Queries on Attitude Toward Religion

Many Replies Throw Interesting Light on Views of Latest Generation Regarding Complex Problems of Modern Existence

By H. F. SPENDER

GENEVA (Special Correspondence)—Are the young people of to-day really different from the youth of the last generation who grew up before the Great War? Have the golden visions which their elders once dreamed become dim and blurred? Are the boys and girls of today less open to the influence of parent and teacher, more self-centered and selfish? Do they care less about religion? What, in effect, 18 their attitude to the problems of life? These and many other questions which were addressed to the youth of the world-through the national committee of the Young Men's Christian Association by the inquiry commission set to the young men and boys suggest again and again the need which they feel of some guiding influence in their lives. GENEVA (Special Correspond- the cause of Christ is sufficiently

tian Association by the inquiry commission of the Y. M. C. A. in preparation for the eighteenth world conference at Helsingfors, which associated the state of th sembles on Aug. 1, are not so much intended to give a key to the riddle of Youth as to afford a basis for discussion. They were meant to stimulate the mind of youth in all parts of the world, so that 't might become more conscious of the part which it has to play in facing life's common problems. At the same time, the reproteins. At the same time, the report which is published as the result of the inquiry unde the title of
"Youth and the Christian Way of
Life in a Changing World" by the
world's committee of the Y. M. C. A.
at Geneva, is full of interesting material for all those who are interterial for all those who are interested in the rising generation.

Questions Conventional The inquiry had one obvious drawback. The questions which were asked were conventional, and the young people too often give the answer which is expected from them while concealing their own thoughts. Nevertheless, so many of the replies have the ring of sincerity, that they throw an interesting light on the attitude of youth to the problems of life and above all to the problem of

On the whole, the youth of today is not markedly different from the preceding generations. If there is a spirit of unrest among young peo-ple it is no more than a reflection of the general unrest of the postwar days. The character of this un-rest is largely determined by the political or spiritual movements prevailing in various countries. Youth has the herd instinct. It is not sur-prising, for example, that in Italy the youth movement should be Fascist and that in Russia it should be Communistic. As might be sup-posed, the young people take on the opinions of their elders.

be one of the chief aims of youth.
But again, as with their elders, there
are young people in whom the desire to be wealthy and play a leading
more and more, for this remarkable sire to be wealthy and play a leading part in the world is a passing phase. As they emerge juto manhood they gain an idea of idealism and learn to regard their work not solely as a means of advancement, but also as a service to humanity. "Youth," says an answer from Switzerland, "desires to be led and to take orders," and indeed there is no evidence."

that youth today in most countries is conservative if not conventional in its attitude, which is surprising in the same house and knew every inch of it. Every article had a place and that in view of the variety of the new article was always in its place, unin its attitude, which is in view of the variety of the new attimuli in our present world to which youth is subjected. Most of us how-journed with the conclusion, for the one thing conclusion, for the one thing the conclusion, for the one thing the conclusion.

After the dishes had been washed they sat on the front porch in the camplaw as to what is good form has ers discovered their hostess love of always held youth in bondage. Poetry. She had composed and com-Therefore when we come across mitted to memory many poems, some young men (who exist now as they have always done in spite of the herd fashioning of poems had been to her instinct) who have a longing to sacrifice themselves to a cause such as Communism or Fascism, or the When the campers said good-by

see visions and pursue them with the fervor of youth, nations would assuredly perish. In spite of all this much-talked-of materialism and realism, we are glad to know that the report of the Helsingfors commission has discovered that young men and women of today are prepared to sacrifice themselves for a cause, even if it be a lost cause, like Communism as most of us account it.

Attitude Toward Religion

Attitude Toward Religion

Attitude Toward Religion
This brings the reader to the most interesting chapter in the pamphlet which we are discussing, to the attempt to analyze the attitude of youth today to the problems of religion, and above all to Christianity. It is clear that there is a great deal of indifference to institutional religion tempered by a patronizingly benevolent attitude on the whole to the churches.

From country after country comes the report that the young men do not care about going to church, and that they consider the services dult and the theology baffling and perplexing. What they look for is "sympathy and understanding in those who teach and preach Christianity."
They need to feel that their pastor is a man who knows how to deal with the realities of life. Can we draw any conclusion, asks the inquiry commission, as to what message our movement should bring to youth of this description, and it answers this question in the following passage:

A Craving for Reality

"Two tasks would seem to be of the control of the proceed to the door of the office, Chick, the little fox terrier, tymped up to greet him, plainly showing his pleasure at meeting an old triend, and followed Bob down and the street to the bank.

When Bob presented the check, he was told identification was required. "Stand up here. Chick," he called, "and tell the gentleman you know me." Chick proceeded to tell the world that he knew Bob.

The teller laughed. "I know that is quite evident that he knows and love you, so I will take a chance and cash the check."

RAIL LABOR UNIONS

BAIL LABOR UNIONS

They need to feel that their pastor is a man who knows how to deal with the realities of life. Can we draw any conclusion, asks the inquiry commission, as to what message our movement should bring to youth of this description, and it answers this question in the following passage:

A Craving for Reality

"Two tasks would seem to be of the chick, the little fox terrier, tymped up to greet him, plainly showing his pleasure at meeting an old triend, and followed

A Swiss Reply

A reply from Switzerland in this onnection deserves to be recorded, for it suggests that a section of the youth of today looks to the Y. M. C. A. to take a stronger line against war as utterly opposed to the first principles of Christianity. On the other hand, if the Y. M. C. A. came into violent conflict with the national spirit in any country it might find that it was regarded with suspicion, and its good work in other directions would be hampered. It is clear that the German youth do not share the view of the young man in Switzer-land as to all war being a crime.

The youth of Germany may be glad that compulsory service has been abolished for them, but if the analysis This is profoundly true. For youth of their views as given in the report is more influenced by example than any amount of preaching or talking.

The replies to the questions which the inquiry commission set to the young men and boys suggest again and again the need which they feel of a general division of their views as given in the report is correct, they are very far from thinking that all war is wrong. While prepared to observe a brotherly attitude toward foreigners they are determined not to forget the duty to general division of their views as given in the report is correct, they are very far from thinking that all war is wrong. While the they are very far from the report is correct, they are very far from thinking that all war is wrong. While prepared to observe a brotherly attitude toward foreigners they are very far from thinking that all war is wrong. While prepared to observe a brotherly attitude toward foreigners they are very far from thinking that all war is wrong. While prepared to observe a brotherly attitude toward foreigners they are very far from thinking that all war is wrong. While prepared to observe a brotherly attitude toward foreigners they are very far from thinking that all war is wrong. While prepared to observe a brotherly attitude toward foreigners they are very far from thinking that all war is wrong. some guiding influence in their lives.

This is very noticeable in the choice of a vocation. It is clear that many of the young men feel that there is much in modern business life which conflicts with their ideals, and that there is something often fundament. there is something often fundamen- patriotism

tally wrong in the relations of Capital and Labor.

How they are to be preserved from young men of all nations to hold How they are to be preserved from hardness of heart on the one hand or from a revolutionary desire to smash society on the other is one of the problems which the Y. M. C. A. proposes to discuss at the conference Moreover, in checking the reaction to the extreme nationalism to which youth is so prone to revert after a period of violence, such as the Great War, the Y. M. C. A. as an international organization has a great opportunity for service to humanity. It

"I Record only the Sunny Hours"

Newark, Del. Special Correspondence MAN and his wife and two Since their elders often set so A children who were on a campninch importance on material success, it is natural that this should brief call on a cousin, who boarded immaculate house they marveled more and more, for this remarkable woman not only did all her housework and cooking, to say nothing of taking a boarder, but it was to this woman that people, both old and young, came to unburden themselves of their troubles and receive comfort and chee

and cheer.

After a brief call the campers
made known their intention of consires to be led and to take orders."
and indeed there is no evidence in
the pages of this report of any serious revolt against authority on thepart of youth in spite of the profound remark of a young man in
Denmark, who complains that adults
hinder youth by not leaving them in
peace to grow.

Youth Conservative

On the contrary, the inquiry shows
that youth today in most countries

On the contrary, the inquiry shows
that lived for years in the same

ever, he wrote the boy a check for

the realities of life. Can we draw any conclusion, asks the inquiry commission, as to what message our movement should bring to youth of this description, and it answers this question in the following passage:

A Craving for Reality

"Two tasks would seem to be of pre-eminent significance: First to meet that craving for reality on the part of present-day youth with a message which is based on inner conviction and on living reality, rather than on words and theories it is only by the manifestation of spiritual power that the hearing and attention of youth can be obtained.

"And secondly, to show youth that

NEW YORK SEEKING CENTRAL AIRPORT

Governor's Island Site Called Best Prospect

Special from Monitor Bureau NEW YORK, July 26—The Mer-chants' Association of New York, one of the most representative groups of business men in the city, has committed itself to finding an airport within easy reach of the metropolis. The development of civil aviation, its members feel, according to a statement from its headquarters, to a statement from its headquarters, is being retarded by the lack of proper facilities in New York, and the city is far behind Cleveland, Boston, Chicago and San Francisco in providing accessible landing fields.

A committee of the association agreed on Governor's Island, one of the military posts in the upper bay, only a few minutes by boat from the Battery, as eminently suitable if a

Battery, as eminently suitable if a part of the open space at one end of the island could be made available. An effort to get legislation through Congress to throw the land open for this purpose will be made it the next session, according to present plans, though the military authorities have opposed the idea and are expected to argue against the necessary leg-

Other sites around the city are also Other sites around the city are also being sought, and some open spaces across the Hudson River on the New Jersey shore are being investigated, though the Governor's Island site is said to be almost ideal. The landing field would need to contain about 200 acres, it is said, and should preferably be a square, 2000 feet on the side, and such plots are almost unknown anywhere within the metropolitan area that could be reached with little delay from the business section of tle delay from the business section of Manhattan. The Government air mail, it is explained, is really landed too far away, the field being at Had-ley Field, N. J., 30 miles from the city's main post office at the Penn sylvania Station.

SENATOR CUMMINS HAD NOTED CAREER

Conspicuous Part in National Affairs

DES MOINES, Ia., July 31 (AP)— Senator Albert B. Cummins of Des Moines, a factor in Iowa politics for 39 years and a leader in the Repub-

Communism or Fascism, or the League of Nations, we had better not be rash, as the report says, in drawing conclusions as to the idealism of youth of its overwhelming desire to serve humanity.

Yet without these young men who see visions and pursue them with the fervor of youth, nations would assuredly perish. In spite of all this much-talked-of materialism and realism, we are glad to know that the report of the Helsingfors commission has discovered that young men and women of today are prepared to

hart for the nomination in the June primary.

Senator Cummins first won recognition in Iowa politics as a leader of the Progressive element but in later years he was known for his important part in obtaining such national legislation as the Clayton Act and the Transportation Act of 1920.

In 1912, and again in 1916, Mr. Cummins approached a Presidential nomination and he once refused a Vice-Presidential nomination.

During the recent session of Con-

Vice-Presidential nomination.

During the recent session of Congress, he served as chairman of the Judiciary Committee, having been defeated for the chairmanship of the Interstate Commerce Committee on which he retained membership as the ranking Republican. He unsuccessfully pressed for action on his bill to facilitate consolidation of railroads and as head of the Judiciary Committee had supervision over a wide range of prohibition proposals.

RADIO PROVES INDISPENSABLE TO FARMERS

Government Summary Now Shows Place Made in Agricultural Work

More than half a million farmers are warned of impending storms or other changing weather conditions instantly by means of radio; approximately 553,000 farms are equipped for receiving spot market quotations by radio; 24 agricultural colleges maintain radiocasting stations, and several hundred commercial private radiocasting stations private radiocasting stations dis-perse agricultural information. Such, by way of summary, is the status of radiocasting in its relation to rural life at the present time. "January first there were 121 sta-

tions, located in 40 different states, broadcasting weather forecasts by radio-telephone on regular sched ules," states Prof. Charles F. Marvin, Chief of the Weather Bureau, "About 95 per cent of all the powerful radiotelephone stations in the United States are now co-operating and many of them broadcast forecasts for several states. People in every section of the country are being served. The scope of the radio-telephone weather service may be estimated when it is known that, for instance, in the State of Iowa alone there are over 33,500 receiving sets on farms. than 500,000 farms in the United ates the radio service provided for the casts are available by radio to more than 500,000 farms in the United than 500,000 farms in

distributing agencies, such as press in 1925 over 1924 was only 5 per associations, newspapers, telephone, and telegraph. Unlike all of these, "Farmers generally have bought radio has the peculiar advantage of instantly disseminating information to millions—all within the twinkling 1923 indicated the average price of

this new means of communication. A survey made by county agricultural agents in 1923 indicated there were about 145,000 radio sets on farms throughout the country. In 1924 the estimated number had jumped to 365,000, and in 1925 to 553,000. The average number of radio sets on farms per county has increased from 51 in 1923 to 204 in 1925. This increase of 300 per cent is evidence that the farmer appreci-

However, you must learn while we are here in camp," replied his father, "This morning I'll give your sister her first lesson."

her first lesson."

So the others went off to the lake while Cy lay on his back and pretended that he was flying. Up over the trees and Bruin Inn flew Cy and circled about the lake where the others were swimming. "What fun, and I didn't have to learn how!" he said to himself. "Birds don't have to learn to fly. They just fly. Why should children have to learn things? Pretending is much more fun." Away over the mountains he flew on wings of fancy.

Slowly he became conscious of a

NE morning at Bruin Inn, as Cy lay under a tree imagining all sorts of heroic adventures, his father called to him: "Come along, Cy, I am going to teach you to swim."

"Thank you, Daddy, but I'd rather not be taught anything during vacation," replied Cy. "I'd rather play and pretend. I've had enough learning for one year."

"Uncle Ben laughed heartily."

"That's a great joke—we never stop learning. Every boy of your age should know how to swim," declared he.

Betty Elizabeth came dancing out of her house in her bathing suit, singing: "I'm going to swim, I'm going to swim I'm going They wished the babies to hop out of the nest and learn to fly.

Cy smiled to himself and said: "I suppose the little birds are saying 'Thank you, but we'd rather not learn to fly. We'd rather sit here in the nest and pretend we can swim like fishes. Pretending is more fun."

well, the little birds continued to sit in the nest, sc at last their par-ents pushed them right out. They tottered and swayed on the edge of the nest for a time, trying to get back into it. But their daddy hopped into the nest and spread his wings to keep them out. Learn to fly they must. Well, the little birds continued to

One by one the little birds toppled over and fluttered to lower branches, where they perched till their parents urged them again to fly. They spread their baby wings and tried again and again, while their parents hovered close ready to swoop under them if they fell. Learning to fly was no easy matter, after all.

With great interest Cy watched

with great interest Cy watched their awkward efforts. He decided that learning to swim could not possibly be as hard as learning to fly. He thought the birds very plucky little fellows. Suddenly, eager to show himself as plucky as the little robins, he darted into the house for his bathing suit. his bathing suit.

But on the way to the lake he met the others returning, so he had to wait for his first swimming Jesson till the following day. Already Betty disabeth had learned to float on her sck and to take a few strokes.

By the time Cy had really learned to swim the baby robins had grown so large and had learned to fly so ell that it was impossible to tell them from their parents.

NEWS BOOK REVIEWS LITERARY

There Are Capitalists and Capitalists

A Review by JOHN HAYS HAMMOND

The Mind of the Millionaire, by Albert W. Atwood: Harper & Brothers. \$2.50.

THE resentment toward capital and individual wealth in general I which characterized the popular thought of 25 years ago, finding expression in the memorable period of trust-busting." has today largely aubsided. If the public has not tacitly additionable to the public has not tacitly auditionable to the public has not provided the popular than the public has not provided the popular than the provided the popular than the popular admitted that the millionaire is "here admitted that the millionaire is here to stay," It has at least learned to regard him more calmly and, looking beneath his outward surface, to study and comprehend many of his motives and impulses.

Mr. Atwood's admirable bookshould clear the air still further in its

accurate but sympathetic presenta-tion of the conditions which surround the modern man of great posses sions. To a certain extent, the title of the volume is a misnomer; the work deals not so much with the mere millionaire who in a land of marvelous plenty is no longer a "rara avis," but rather with the man of many millions: the financier, the corporation head, the great manufac-turer, or perchance the individual who has simply inherited a great fortune. Is this group, with its im-mense power over the outward lives and fortunes of thousands of emloyees, with its concentrated wealth and far-reaching business and social prestige, really clothed with the menace which certain people still

The answer would seem to lie with the formula which, duly filled in, can be applied to any class of beings any-where: there are millionaires and millionaires. As the author aptly "The millionaire is not any one sort of person. He is as varied as the interests and activities of the country are varied. He is an expression of our whole vast and uniform national growth."

national growth."

There is no question that the softening of the public attitude as a whole toward the once feared and hated millionaire is due to the latter's

ease because he suddenly awakens to find himself the possessor of millions. The very qualities which brought him to the front compel him to continue the climb as long as there is breath in his body. Is it not true that success, like wealth itself, is relative? Is the millionaire to the success, like wealth itself. s relative? Is the millionaire to be enfed higher ambitions because he prudence, economy and, in the las

the being a force of nature instead of a feverish, selfish little clod of allments and grievances complainallments and grievances complain-ing that life will not devote itself to making you happy."

Burdens of the Wealthy

Upon the man who, by his own ability and unremitting toil, has attained his purpose-whether it be to manufacture merry-go-rounds or build up a transcontinental railroad system—and who beholds, in the re-sults, that purpose justified, it seems unreasonable to heap blame and cen-sure because he seeks ever greater and greater achievements. Is it con sistent, then, to deny him the re-ward of his endeavor? "The laborer is worthy of his hire."

It may well be, however, that un-der the present economic system the producer receives more than his just share. That is a matter which has been debated since men first formed social communities, which time and progress may yet decide. Meanwhile those who claim that the inventor, the manufacturer, or the great cor-poration executive receive incomes disproportionate to their contributions to society are frequently ob-livious to the burdens which rest upon the wealthy man of today. It is true that the very rich are

There is no question that the softening of the public attitude as a whole toward the once feared and hated millionaire is due to the latter's present astounding versatility. No longer is the very rich man to be found in a comparatively restricted class of bankers, mine-owners, railroad men, steel magnates and the like. He may be a manufacturer of collar buttons, a cold cream king, a novelist, a chewing gum czar or a movie actor. Wealth, great wealth, has at last become democratized. Everything is open to the boy of today, and prosperity lurks round every corner if he be shrewd enough to find it. In the face of this it is impossible to indict wealth on the ancient plea that it is reserved for "the favored few."

Two Principal Types

But despite the multiplication of the sources of wealth, the broad distinction among 'fich' men obtains no less now than in the palmiest days of the plantation owner and the private banker. There are still only two types of millionaires in his sense.

class of banker, mister-owner, religiously makes which the poor man or even the average passes of the collective control of the poor man or even the average passes of the collective control of the poor man or even the average passes of the collective collective control of the poor man or even the average passes of the collective collective

is relative? Is the millionaire to be denied higher ambitions because he has fulfilled lower aspirations?

In the preface to Bernard Shaw's "Man and Superman" there is a passage which I have often pondered upon:

"This is the true joy of life: the being used for a purpose recognized by yourself as a mighty one; the being thoroughly worn out before you are thrown on the scrap-heap; the being a force of nature instead the being a force of nature instead the same and the product of the millionaire is held to an accountability every inch as strict ization.

"Through hard, unyielding labor, prudence, economy and, in the last results fairly familiar to all. She failed. Already she has had to repudiate the very essence of the Red abolition of personal ownership.

Destroy private initiative and you remove public enterprise. Banish this money are soon parted." In one way or another, by natural or manmade laws, the millionaire is held to worker which sets the pace for civilization. History still remains but

royal road to success; no divine right

There are, no doubt, many abuses still practiced actively by wealthy individuals and organizations. Both are being, and can still further be curbed. Shall we follow this path of rational progress, or shall we put a ban upon personal wealth and de-cree the large-scale business a

Russia tried the latter course, with

Author of "The Dreadful Decade"

But in Our Lives, by Sir Francis Younghusband. New York: D. Appleton & Co. \$2. S IR FRANCIS YOUNGHUS-BAND writes in an almost forgotten language. Kipling used it, to be sure, but Kipling remains as a relic of another era, the era

To the Glory of

England

as a relic of another era, the era before the war. It is the language of imperialism, of the white man's burden, of duty to England. The con-cluding words of the book, com-memorating the achievements of its hero, give the key: "Because of him England will give birth to others of his kind—but better, as he himself would have wished; and what he did

for England will live and grow for

"But In Our Lives" is called u novel. More strictly, it is a biography, or still more exactly, a memorial. Throughout the book the author speaks of his hero, Evan Lee. his daring initiative and noble sac-rifice, secured a lasting peace." This is precisely what Evan Lee did, and one feels that the book is largely a biography of Major Daniell.

Tone Is Religious

boy destined for the army, with day

school. public school and military college. He went out to India with his father's advice sounding in his

his father's advice sounding in his ears: "Whatever you have to do make the best of it. Do it with your might. If you are told to do a thing, do it. Don't raise difficulties. Do it with your best."

When the did. He drilled and trained endlessly and lived a decent life and took care of his men. When he was sent on a mission, his first thought was for the Empire, his second for the Empire's children. "We are like English nurses to these people," he said, "watchful, patient, quick and firm to check naughtiness, but loving at heart." That must be the way those men felt who wrote about the supplementation of democracy in several countries of Europe, echoes or which have not failed to cross the Atlantic, it is but natural to refer back to him who had most to do with launching the democratic ideal.

It is not without significance that proved incapable of leading human progress, it might be deading human progress, it might be men that proved incapable of leading human progress, it might be men that proved incapable of leading human progress, it might be men that proved incapable of leading human progress, it might be men that proved incapable of leading human progress, it might be men that proved incapable of leading human progress, it might be men that proved incapable of leading human progress, it might be men that proved incapable of leading human progress, it might be men that proved incapable of leading human progress, it might be men that proved incapable of leading human progress, it might be men that proved incapable of leading human progress, it might be men that proved incapable of leading human progress, it might be men that proved incapable of leading human progress, it might be men that proved incapable of leading human progress.

It is not with the reopening of the whole question of democracy in several countries of Europe, echoes or which have not failed to cross the Athamble and in the p those men felt who wrote about the service as Kipling did, with a capi-

It would not be hard to find absurdities in Sir Francis Younghusband's immaculate hero and in the naïve diction employed throughouthe book. Yet ridicule is forestalled as if Lee's experiences and his char- by the unaffected seriousness of the as if Lee's experiences and his character were genuine facts. Indeed,
writer's purpose: forestailed, too,
they are hardly picturesque enough
to have been invented. The book is
dedicated to the "glorious memory of
Major Averell Daniell, who was
killed in action on the northern
frontier of India, 1893, and who, by
his darks intitiative and noble seem to be a happy medium of exing about. The novel form does not seem to be a happy medium of expression for him. When he writes about the jungles of India and the glories of the Himalayas he is at his best. In character portrayal and disloyers he falls about of the illustration dialogue he falls short of the illusion

Tone Is Religious

The title, "But In Our Lives," is a fragment from the Book of Common Prayer, "That we shew forth Thy praise, not only with our lips, but in our lives," and the tone of the book is strongly religious.

Lee's sphere of service was India. The author follows the course of his life from the time he was a little boy in England, child of parents who were obliged by the service to be accurated from their children. He went through the usual routine of a land.

ering except the "Ancient Mariner, "Kubla Khan" and "Christabel"—an

the last, according to Mr. Fausset,

would scarcely have been written without the inspiration and the ac-tual assistance of Dorothy Words-

Coleridge Unflattered

Jefferson, 150 Years After

to him who had most to do with launching the democratic ideal.

It is not without significance that Mr. Hirst's English biography of Jefferson has aroused extraordinary interest in British literary circles, though it has not succeeded in sweeping away certain deep-rooted misconceptions of Jefferson's political views. A prominent London critic, commenting on the Louisiana purchase, observes: "It was precisely easily killed. It may be swamped for a season by a violent flow of thought ferson his chief title to greatness." his imperial vision which gives the ferson his chief title to greatness," while another distinguished writer truth in it will some day re-emerge, fiftds that Jefferson was "the great-lefterson thought of human society as more or less established in its

Music News of the World

Criticism on a Percentage Basis

By W. H. HADDON SQUIRE

bigoted critic could not deny it—en-tirely characteristic of the present time. Never before in any orchestra time. Never before in any orchestra had one encountered so many horns.
Which indeed were numerous enough an oratorio by Handel and Bach's to have satisfied even Richard Mass in B minor." In London Coc-Strauss. The percussion consisted chiefly of bells. But perhaps the chiefly of bells. But perhaps the being reached by the critics who most remarkable feature was the heard only "some funny noises." combination of musical and "uncombination of musical and "unmusical" sounds, or as no doubt
some people would prefer to have it,
music and noise. An astonishing
variety of free yet machine-smooth
rhythms, irregular sound patterns
pricked out in "pointillist" spots of
vivid color against a dull ground-tone
suggestive of whirring wheels, these,
mingling with the clang of helis
head of his fellows of 1926. As an mingling with the clang of bells, ahead of his fellows of 1926. As an caught and fascinated the ear. Then, surprisingly, on the swift stream of aghileft's finest achievements, at a branch of withered leaves, the sound of a voice singing a sentimental.

The Erik Satie Festival was a sentimental of a voice singing a sentimental. of a voice singing a sentimental song of the day before yesterday, with its "la lune, l'amour, l'extase." and the rest of a perished poetic

vocabulary.

It must be admitted that this futurist music shares with Wagner's "music of the future" the fault of excessive length. In fact it is even longer, for it never ends, and one must confess without further delay that it was heard through the open window of a hotel in the heart of Paris—near the Rue Boissy d'Anglas, made famous by Darius Milhaud and Jean Cocteau. The principal per-formers of this moto perpetuo of the Paris streets were motorists, taxicab and tram drivers with their horns and bells, aided by a chance street singer. Paris has plagiarized on a gigantic scale the methods of Marinetti and Edgar Varèse.

An Ingenious Ready-Reckoner

Some have claimed that the artists who most completely express their own period are not the greatest, but nearly always of the second rankthe really great transcend their own age. This contention may serve as a missile for critics to shy at the popular Aunt Sallies of the moment, Stravinsky and the French "Six." but even the really great artists never transcend their own by ex-pressing another period, a feat which they are invariably invited to attempt by contemporary criticism. As Jean Cocteau says, the public takes up yesterday as a stick to beat today In his "Cock and Harlequin" he offers us the following statistics:

Those who defend today by mak ing use of yesterday, and who antici-pate tomorrow (1 per cent).

Those who defend today by destroying yesterday, and who will deny tomorrow (4 per cent). Those who deny today in order to

defend yesterday, which is their

today (10 per cent).

Those who imagine that today is a mistake, and make an appointment for the day-after-tomorrow (12 per

who defend yesterday in order to prove that today exceeds legitimate bounds (20 per cent). Those who have not yet learned now governed is differently viewed by everyone according to his own political tendencies. I shall

that art is continuous and believe that art stopped yesterday in order to go on again, perhaps, tomorrow

Those who are equally oblivious of the day-before-yesterday, yesterday, and today (100 per cent)."

Diaghileff's Ballet

It seems a pity that more practical use is not made of this ingenious ready-reckoner. For example, Serge permits of a solution of problems which seemed insoluble before 1922. son at His Majesty's Theater, London, has had its usual enthusiastic welcome from the intelligentsia and, alas, its usual enthusiastic depreciation by the press. A common-sense metfied of dealing with this absurd breach of opinion would be the classic conservatories—I can state that five days' work made it possible at this preaction to the reform of state that five days' work made it possible at this impact theories of the style which now governs Roman life.

The first of these problems is primarily financial. How is the absolute material independence of the new theater to be assured? Although nothing has been officially decided, breach of opinion would be the classification of critics according to Cocteau's formula. Diaghileff's manager could then approach the editor of a London paper and politely re-quest him to send a 1 per cent critic, opera impresario might ask for the 60 per cent man, and the pur-veyor of revue for the 100 per cent, and so on. Everybody would be happy. The initial sorting out might be a rather delicate matter, but we should be spared the spectacle of a snould be spared the spectate of a well-known critic asserting—apropos of the work of Derain and Picasso—that "the scenery of both these ballets, if used in a Wigan pantomime, would have been hissed off the stage." Wigan seems a queer place to which to so for methetic standto which to go for æsthetic stand-ards. Such a source, of course, would explain many current critical mysteries, although one may be doing another injustice to an innocent Lancashire town already much em-barrassed by the libelous attentions of stage comedians.

The composer no less than his fellow artists, must reflect his own

which seems to have discharged this duty poorly enough. Today it is evi-dent that no "interested" manage-ment can achieve a work of art, and

London, July 20 French writer and composer, Roland Manuel, described "Les Noces" three writer heard some "futurist" years ago as an overwhelming masterpiece which marks one of the boldest and best assured triumphs of teau's higher percentages were heavily represented, the ultimate perhap

time to put into practice theories of reform which had been regarded as utopian during the preceding 40

years. And examples of this kind

could be multiplied ad infinitum. But for today it will suffice to speak of

one extremely important national problem to which a highly interesting and radical solution has just been found: that of the lyrical theater of

The Costanzi Management

I have often spoken through these columns of the mediocrity of the per-formances of the Costanzi in Rome.

Also I have long since explained the technical reasons for the artistic and financial superiority of the Scala in

Milan. This is not the place to call a trial of the Mocchi-Carelli direc-tion, which for many years past has had the direct responsibility of the management of the Costanzi and

Rome, July 10

was actually the first composer to employ the impressionist technique, and used sequences of consecutive ninths years before Debussy, on whom, with Ravel, and later, Auricand By ADOLPH WEISSMANN management. This, however, would not have been enough it Princess Turandot herself had not found a representative capable of enchanting her wooers. This was Anne Roselle, and used sequences of consecutive ninths years before Debussy, on whom, with Ravel, and later, Auric and Poulenc, he certainly had a marked influence. Perhaps unfortunately for himself, Satie was a musical humorist, and, like other humorists, found it very difficult to get people to take him seriously. He left pages of clear, serene, luminous beauty—the first "Gymnopédie," for example—but unless the listener has a palate for the peculiar Satie savor, the "inspired village band" of "Parade" and "Jack in the Box" will not appeal to his taste.

Auric's "La Pastorale" drops below the level of his successful "Las" and her self had not found a representative capable of enchanting her wooers. This was Anne Roselle, an Americanized Hungarian singer, cian, to its assistance. He assumed the task of providing the stage management, but at the last moment Kurt Taucher, who was to sing the part of the unknown prince, fell out. Where could snother tenor be found? Richard Tauber was ready to replace him. He had, it is true, for saken opera for operetta, but after all he is a very good musician, and performed the feat of singing a part with which he had been familiar only for a few days.

"Parade and Jack in the Box will not appeal to his taste. Auric's "La Pastorale" drops below the level of his successful "Les Matelots"—with the possible excep-tion of the last 100 bars or so—but it does not deserve the harsh things said about it. said about it. The music of the other new ballet.

"Romeo and Juliet," is by a very young English composer, Constant A Satie Festival

The Erik Satie Festival was a Frenchmen's musically immaculate tribute of the Russian Ballet to a swallow-tails and button-holes, there

Here, then, is the ground cleared

The resources necessary to the run-ning of the new theater will be as-

condemn the Italian master for the simple reason that he was not quite so modern as they believe themselves

man whose music aroused both violent and contradictory emotions in his own country. One of the oddest and most original "characters" in the history of music, he opera as a work of art, though, in certain very modern masters, an in-

people, but which gives him a stamp of his own. I see the weak points in Puccini's "Turandot" but I feel that his individuality miniants itself in spite of all that conspires against it. For Puccini, when writing his last opera, proved even more artificially ambitious than in his preceding works, and to such an extent that he, who was a connoisseur of the stage, allowed his librettists to put a stumblingblock in the way of effect by a lack of straightforwardness in the plct and by the mixed style of the book's composition. How is it, then, that the effect was obtained at the first German performance at the Dresden Staats-oper?

July 4 is a very unusual date for a lack of straightforwardnes at the plct and by the more approached to some minutes and provided the stage of the book's composition. How is it, then, that the effect was obtained at the first German performance at the Dresden Staats-oper?

July 4 is a very unusual date for a lack of straightforwardnes are the provided at the first German performance at the Dresden Staats-oper?

July 4 is a very unusual date for a lack of straightforwardnes are the provided and started for a lack of the lack of

July 4 is a very unusual date for a first performance in Germany. It is extremely difficult to attract people, especially a première public, to the theater in the "dog days." Bayreuth is an exception to the rule. Now Dresden is particularly ambitious in the direction of first per ormances. The Injendant, Alfred Reucker, and the Generalmusikdirektor, Fritz Busch, make a point of being the first to give a new work. The direction of the Opera House had called Issay Dobrowen, the Russian musi-

The Costanzi as a State Theater

cial endowment to the new Rome, an endowment which enables one to dare expenditure which would have been fantastic for the old modest communal budgets. It is thus that the new state of affairs has in a should be a state of affairs has in a should be a state of affairs has in a should be a state of affairs has in a should be a state of a st completely to transform the old hall and to adapt it to modern requirements. This will take over a year of all its vexatious past. Now the and will involve the closing of the new lyrical theater has to be organ- theater during the whole of next sea-Diaghileff's Russian Ballet, which is just closing a very interesting sea
realm—the advantages of this new crop up and they must be solved in a stage will be enlarged and they must be solved in a stage will be enlarged and they must be solved in a stage will be enlarged and they must be solved in a stage will be enlarged and they must be solved in a stage will be enlarged and they must be solved in a stage will be enlarged and they must be solved in a stage will be enlarged and they must be solved in a stage will be enlarged and they must be solved in a stage will be enlarged and they must be solved in a stage will be enlarged and they must be solved in a stage will be enlarged and they must be solved in a stage will be enlarged and they must be solved in a stage will be enlarged and they must be solved in a stage will be enlarged and they must be solved in a stage will be enlarged and they must be solved in a stage will be enlarged and they must be solved in a stage will be enlarged and they must be solved in a stage will be enlarged and they must be solved in a stage will be enlarged and they must be solved in a stage will be enlarged and they must be solved in a stage will be enlarged and they must be solved in a stage will be solved in a st with all the most up-to-date machinery and lighting. The theater will include a school of dancing and another school of scenic art. In admarily financial. How is the absolute material independence of the lute material independence of the provides for huge premises in which provides for huge premises in which provides for huge premises in which are the provides for huge premises in which provides for huge premises in which provides for huge premises in which are the premises and the premises are th lute material independence of the new theater to be assured? Although nothing has been officially decided, one knows the general basis of the financial organization. The theater (which will be called "The National Opera Theater" will, like the Scala, be organized as an "autonomous" government, that is to say, it will form an operantation with a life of concert hall and, in fact, the space necessary to make the new theater the chief center of national lyrical activity, not only in the deplorably commercial sense that this activity has up till now assumed in Milan (which was and still is the real form an organization with a life of its own without any lucrative aim. bourse" of Italian theatrical matters), but in quite another sense of intellectual dignity and high en-

The resources necessary to the running of the new theater will be assured, outside of receipts, by (a) a state subsidy; (b) a subsidy from the Governaturato of the town; (c) various subsidies of banks and public institutions; (d) finally, a last and very important source of revenue could be devoted to the National Theater by the application of the new law (of which I have spoken in a previous article) which establishes in Italy—for the profit of certain institutions of highly artistic character—the "author's rights in works which have falled into the public province." Such are the general facts which will constitute the financial plan.

Administration

As far as the administration is concerned, it seems that the new the ater will be directed by a "supering taked with such boldness and the plant of the deavor.

Intellectual dignity and high endeavor.

Such are, broadly speaking, the essential aims which serve as a basis for the establishment of the essential aims which serve as a basis for the establishment of the new Roman lyrical theater. One must now see them at work and, little soon vanished beneath a torrent of assage work. The theme and variations of the second movement roused feeble interest by a seeming on the influences and results that its institutions and operation may have a continuous and operation of the method in the tumor of the must not expect too much. On the other hand, it cannot be desided that the foundation of a stage organization of such importance, so modern and so disinterested as the "National Opera Theater" will be may have a control the whole keyboard they subjected performer and its ended to the same as on their previous appearance, with again the same good and one of the same at torrent of assage work. The theme and variations of the second movement of "Ow where as an adverted to the same at orrent of assage work. The theme and variations of the second movement in situations of the second movement of the same at torrent of assage work. The theme and variations of the same at the sam deavor.
Such are, broadly speaking, the barrassed by the libelous attentions of stage comedians.

The composer no less than his fellow artists, must reflect his own may of his critice he delibrated by rinn a these many of his critice he delibrated by rinn a these both. George Anthell with his "electric opera," for which the orchestra consists of a battery of 12 electric planos, and which ends in a big bang, may raise a smile, but he has grasped something often ignore—the difference between life in Paris, London and New York of today and that the Vienna of Beach over and Brahms of yesterday.

"Les Noces"

Diaghileff has this season offered us nothing so startling as Mr. Anthell's "opera." We have however, heard a work, the orchestra for which consists of two double planos and percussion. (The plantist of two double planos and percussion. (The plantists of two double planos and percussion.) The plantists of two double planos and percussion. Well Received It must be said that the performance in Dresden proved more suc-Now, however naturally inclined to modernity, I cannot discover any reason for higher appreciation of an all know that Toscanini as the leader The music of the other new ballet, "Romeo and Jullet," is by a very young English composer, Constant Lambert, and perhaps youth is the chief element of its undeniable charm. The score has an engaging youthful "swagger"—"swish," one believes, is the correct contemporary term—and if the musical gestures are often strangely reminiscent, and we catch fugitive glimpses of Stravinsky and Ravel, and the younger Frenchmen's musically immaculate swallow-tails and button-holes, there is a candor and freshness about it all against which only a 100 per cent critic could barden his heart. Constant Lambert certainly has any amount of natural talent.

The most modern school of music to the most modern school of music be surpassed. He had indeed, with the choral paper to the score is treated. Nor can one overlook the so many rehearsals that nothing remained doubtful as to the rendering of the score. In this respect, the performance cannot of sa no operatic performance cannot of an operatic performance cannot of an operatic performance cannot in surpassed. He had indeed, with the choral paper to the score is on operatic performance cannot of an operatic performance cannot nothing remained doubtful as to the rendering of the score. In this respect, the performance conducted by Fritz as real cannot nothing remained doubtful as to the rendering of the choral paper to the score. In this respect, the performance conducted by Fritz as cannot not be c ing, yet he conveyed to the hearers a fano began that a change of mood very good impression of the instrumental part of Paccini's opera. certain very modern masters, an inclination toward it cannot be overlooked.

Individuality Maintained
What raised Puccini above the standard of imitators, even of those up to date, is his individuality, which often may not be to the taste of some people, but which gives him a stamp of his own. I see the weak points

BEYOND comparison, the literature of music for the planoforte is richer than that for any other instrument. Yet a deficit remains, and it is in the department of works for one hand alone. Existing two-hand pieces have been arranged for one hand, left-hand studies have been written from time to time, but original work on a large scale has been tackled by one or terrating only a remaining only a scale has been tackled by one or two planists and composers, among them Paul Wittgenstein and Richard

The private recital given by Wittgenstein to the press and a number of professional musicians at the Wigmore Studios on July 7 intro-duced the planist himself and new works by Richard Strauss and Bortkiewitsch to England. Wittgerfstein has phenomenal dexter:ty with his left hand. He produces a big tone, at times too heavy, but very effective in cantabile. His swiftness and mobility are remarkable. He disentangles with ease the most complicated passages, and threads his way through every difficulty of part playing. In two studies by Chopin, arranged by Godowsky, he astonished by his competence and completeness. He is a left-hand Paragon. kiewitsch to England. Wittgenstein

New Works Disappointing

ers to arpeggios by the mile. Restful rhythms, few notes, chords in close position, can be very effective when rightly used.

teresting only as an early example of his pictorial illustrations. Otherwise it is one of those torrent'al, theatric compositions which make Liszt appear a smaller man in mine-Liszt appear a smaller man in mineteenth century music than he really was—exactly as his "Faust" Symphony gives an impression of greatness beyond the recognition accorded him. Liszt always was something of an engima. But he. Schumann, Chopin, and Brahms all knew supremely well how to write for the planoforte. Orioff had chosen his program so cleverly from their works that enchanting glimpses were afforded of what these four had learned from one another.

Nowadsys to Young England this music seems remote and is viewed in as detached a manner as Haydn, Beethoven or any other classic. To the leaders of the British Renaissance its problems were contem-

New Works Disappointing
He was quite as good in the new works, but in themselves they were a disappointment. The Concerto by Bortkiewitsch is long-winded and rhetorical. Compared with the "Parergon to the Sinfonia Domestica" by Strauss it might be said to be eloquent. The Parergon is most certainly a "by-work" to one which in any case is among the poorer works of Strauss. To make matters worse, the unavoidable use of a second piano in place of the orchestral accompaniment wrought monoty only where the orchestral tone color should have brought relief. Knowing the resource and originality of the modern only where the orchestral tone color should have brought relief. Knowing the resource and originality of the modern of the British Renaissance its problems were contemporary and vital. Sir Alexander Mackenzie, one of the original leaders, was the guest of honor at the Music Club's reception in the Old County Hall on July 4. In his speech of thanks he referred to his career than a propositions were performed that evening. Isolde Menges gave a fine reading of two movements from the vening the resource and originality of the works of trause. the leaders of the British Renais-sance its problems were contem-porary and vital. Sir Alexander Mackensie, one of the original lead-ers, was the guest of honor at the Music Club's reception in the Old Strauss's scoring one can well be-lieve that without it much was lost. by his performance at a Royal Phil-baut no beauty of color could alto-gether cover up the triviality of the musical ideas. At the beginning of the first movement a few pages of

Quality Pianos Have This Famous Action!

In sacking quality in a plane, you first consider tone, touch and durability. You should know that these three vital elements are largely controlled by the plane action. Insure your plane purchase, therefore, by insisting upon the Wessell, Nickel & Gross action—used by leading American plane makers for more than 50 years.

Furthermore, the Wessell, Nickel & Gross action is the world's high-est-price is just another indication of its supreme quality. This famous product is built by the oldest largest and leading maker of high-grade, plane actions

WESSELL NICKEL & GROSS Established 1874 New York City

Preserved Opera

By WINTHROP P. TRYON

New York, July 29

PERA productions will one of these days be recorded on the film and the phonograph, if I understand the mechanicians correctly, and will be made available not only to the small ; udience of the opera house, but also to the vast public of the motion-picture theater. As the great arias of opera, by means of the disk and needle, were put within everybody's hearing yesterday, so the characters, the action quite agree with each other; that the Chinese part is sometimes an obstacle to the more tragic element represented by poor Liu, the slave sociation with the lantern (perhaps "projector" is a term of better repute), will be placed within everybody's hearing and sight tomorrow. In talking of the matter, the mechanicians make use of a word which strikes me as rather hideous; though if I can speak a compound like "automobile" without objection, perhaps I ought to be able to say their word, "vitaphone," also. They will maintain that, having combined two hitherto irreconcilable natural manifestations, sound and light, they should be permitted to celebrate their triumph by a little innocent synthesis of Latin and Greek. While granting a certain plausibility in the argument, I must stand with the rhetoricians in disapproving mixed rhetoricians in disapproving mixed coinages; and must point out that when invention and convention fall

into dispute, the referee, time, has a way of giving the judgment to A Documentary Fixture Talking from the experimental standpoint only—for the mechanicians by no means make impossible boasts about the vitaphone—a performance of opera can be recorded in all its musical and dramatic actuality and reproduced to ear and

that it cannot get away. In time to come, today's representations of "The Barber of Seville," "Lohengrin" and "Rigoletto" can be reviewed and studied, and can be used permanently as models, if they happen to be worthy of imitation. There can really be such things as classic performances, kept on the library shelf and brought down when wanted. At the office of the Manhattan Opera Company in Steinway Hall today, I heard talk of the Manhattan Opera House in which Oscar Hammerstein used to give his seasons being displaced, real estate conditions determining that something besides a theater should stand on the ground it occupies. Furthermore, I heard talk of a possible new Manhattan Opera House aomewhere uptown, whither everything musical is tending.

"Manhattan" Companies
It struck me as interesting that the
name, "Manhattan," promises to
survive thus in association with
opera. It was Hammerstein who
gave the name its musical acclaim,
though I was made aware that the
designation, "Manhattan Opera Company," was not the one assumed by
Hammerstein. A program of his first
Boston season, for example, in 1909,

miles of stores and multitudes of homes. London, New York, Paris, Berlin and other great capitals, how they impress us with the magnificance of th rise of the modern city. When man

Men and women are creatures of convention and to whatever wilder-ness he journeys a town soon springs up round him. Like Lot, he pitches and the laws of the philosophers his tent first toward Sodom: but ere long the lure of the city's by day, the fascination of its lights by night, are too much for him. Soon he "sitteth at the gate"—is Mayor, or something like it! He makes his I turn my eyes to the sensor.
universities of Europe,
And there behold the loom of
Locke, whose woof rages dire
Locke, whose woof rages dire
the country to the town; secondly, by acquiring the week-end habit, that is, once a week he goes to the country for such refreshment and cleansing as nature can give thirdly, when he cannot do either of these he subsists on the promise to himself (and the perpetual retelling of it) that some day he will return to his native state where he can once more plant his own cabbages, grow his own roses! It is probably the attempt to recapture the memory of this promise that mankind is experimenting on the modern "garden city." Think of all the articles of religion and the doctrines contained I will not cease from mental in that term! A man's deepest racial fight,
Nor shall my sword sleep in my hand,

Solution is a garden! His highest earthy aspirahand,
Till we have built Jerusalem
In England's green and pleasant land.
William Morris reacts against the artificiality, conventionality, and hollowness of a later time than Blake's.
He sees ambition tense and intense,

the fierce race for wealth, the battle a vain struggle, so he thinks it hetter to dream, for dreams never districted to the structure of the s In the country we can be natural, Forget six counties overhung with If you want to whistle you can blow nor so much conventional red tape. Forget the snorting steam and crookedest. If you wish to sing you piston-stroke.

Forget the spreading of the hidor somebody roaring "Silence!" and rather of the pack-horse looking daggers at you. You can wear a negligee shirt with the neck And dream of London small, white, and clean. The clear Thames bordered by its gardens green.

Likewise Edward Carpenter, prophet of imaxination and democracy, in his can be ladies and gentlemen without cluttering our movements with unnecessary conventional detail. In the country we can leave off phylac-To an sit in any chair, without the tear of sending the face curtains into disarray. In other words we can be ladies and gentlemen without cluttering our movements with unnecessary conventional detail. In the country we can leave off phylace and the amiable fixed smile of the town. Our speech and behavior can be spontaneous and natural, and also beautiful.

In the country we can dream. I do not mean the dream of sleep (leave that for the town), but the dream of lucid reverie where thoughts come on the light wings of

co not mean the dream of sleep place as glows your garden, where aloom side by side the sumdream of lucid reverse where thoughts come on the light wings of Shedding fragrance rare, bestowing dream of lucid reverie where thoughts come on the light wings of fancy drawn. Once the forest was the center of human life; in the Middle Ages, the center was the cathedral; now it is the railway station! Is this progress? Well, as I tion! Is this progress? Well, as I In that garden full of mother-love, say, in the country we can dream. Though I will own up that the first few days in the country the town in Pickwick. But after three days turn the corner. Thoughts come to me in a quick succession—like chained lightning. Something in the me in a quick succession—like chained lightning. Something in the country leaps out at me and pulls me into the play of its tremendous verities. Somehow I get close to nature in the towering mountains, blossomy trees, foaming rivers, and the world of which Wordsworth wrote—"The world is too much with us"—drops from me like an ill-fitting cloak. The door is shut on passing fads and phases: One can contemplate nature till the touch of cosmic emotion puts a ladder to the skies with choirs of singing angels on it. It is out in the country that the dream of angels always hovers above my stony pillow.

And in the country you can "stand and stare," as William H. Davies, the poet suggests we all should do. You try that recreation in the town, and likely as not you will feel the critical may be a small volume from that the dream of the country that the dream of angels always hovers above my stony pillow.

And in the country you can "stand and stare," as William H. Davies, the poet suggests we all should do. You try that recreation in the town, and likely as not you will feel the critical may be a small volume from the taken.

Much I love and that you, whother, still I am your debtor

for the years that came and went, and yet are here to come. Always must I bless you for the weeding and the tending.

For the toil and sacrifice, your garden weeding and the tending.

For the toil and sacrifice, your garden weeding and the tending.

For the toil and sacrifice, your garden weeding and the tending.

For the toil and sacrifice, your garden weeding and the tending.

After resting a while, the shepherd goes off in at different direction calling his fack. Shepherd soften call each of their sheep, your fact

and sare, as whithin in Joyles, the poet suggests we all should do. You try that recreation in the town, and sikely as not you will feel the critical eye of the policeman on you; or it may be the gentle touch of a kindly woman who tries to lead you away! But in the country you can do it without anyone noticing. That is what I like to do. I love to look at the wonder of colors on the waters, the majesty of the trees, the fiaunt of the mountain crests, the thread of scarlet on the hills. "Look at that!" I say, pointing to an array of little clouds like flames drifting clear of the hills. Or I point to the horn of the new moon over the hilltop, the peppering gold in the tamarack woods in spring, the scarlet maples among the yellowing birches in the fall. In the country I can drink in space with Shelley, forget time with Edward Caird, look at the stars with Kant, sing the poetry of Robert Bridges, and breathe blank verse to suit my eccentric fancy.

In the country there are attractions that last. For though you cannot put the sunsets in your pocket, thank heaven you can drop them lint other memory and the resured to the heart. In the country one can play with the sun and wind and cloud, nothing can stale the variety of the changing seasons.

O country Hving, how I love you, and would accude a last the responsible of the same of the remain Grimm and cloud, nothing can stale the variety of the changing seasons.

Much I love and thank you, Mother, still I am your debtor For the years that came and went,

On the Crater's Brim

The Noonday Rest by Ain Farah

In that garden full of mother-love, tender, guiding care, where the songs were deep-felt praise, and all your looks were blessings.

Which bred courage, steadfastness and trust in things above.

I lages (it may be from old Anathoth close from old Anathoth the green certainty of England become the assemble, and after restoring their souls at the mint-bordered stream, they rest for a few hours in the

And here it was, upon the crater's down under the wild damsons to the brim, that the circuit of my wander- lake. Overhead the steel-blue screen ings was completed. England, that rise sheer, and along their exalted had never seemed so far before, was edge a sheep is grazing. What do you never brought so near, here as I need mage? Here is water to drink, tottered at the edge of the credible water to dive into, blackberries to He

hollow through the vapours. . . . Ex-quisitely clear beyond a pathway of the green Northern sea, the . . . In-tricacy of England deployed, county beyond county, chalk down and hedge and calms marking the path

on the gorse, but broom was nowering into lyrics of clean gold. Streetlong trailers of wild briar connected far trees with messages... Orangetawny bills of blackbirds stabbed the undergrowth. Here were flowers which never bloomed before, and birds which no other man has ever heard sing. O perfect dingle, waiting under the lee of your hills!

Then in a moment it was evening. Over the downs of Winchester evening falls with more quiet and more sound than England knows elsewhere, it is so quiet that you can hear the unborn wheat whispering under the ground; you can hear the towers of the city rising out of the dusk, gracefully, unwaveringly, like fountains which no wind stirs; you can hear the ships wishing down the long silences of Southampton Water, where in the fiery cinnamon and opal-green marshes on either side the marsh-fowl clack their wings and go to sleep. This evening of spring is spal-green marshes on either side the marsh-fowl clack their wings and go to sleep. This evening of spring is more like an autumn evening. For the sun splashing through the hedges fings leaves of bubbling gold into furrows. ... You cannot see the buds on the hedges. Mist round the treatrunks; over, under the burdle-gates; lapping round the barn now gathering dark between its rafters.

Here is a small green glade at the head of Lake Crainant. A stream goes

water to dive into, blackberries to pound in your tin pan, mushrooms to fry, and near at hand, beyond the brow of this excluding hill, goodly folk to provide you with bread and milk and eggs. Now suddenly the glade is lifted upon the shoulders of these volcanic islands of Lipari in the Tyrrhenlan sea. It seemed that nothing ever was, could ever be so hopelessly unattainable as England henceforth. Amid this uncertainty of shaking mountain and boiling sea, the green certainty of England became unbelievably far and precious.

The crying of the lonely plover
From the morning cloud.
Do the wings and clouds ethi hove:
Where my heart sang loud? And I know not what potency ha

spirited me away so swiftly ere the desultory rhyming slacken. Here am I on Channel's edge! Sea and cliffs tricacy of England deployed, county beyond county, chaik down and hedge and cairns marking the path over Greenup Edge, which descends at length into Borrowdale. The scent of hawthorn and honeysuckle, of mown hay and the spilth of autumnal beech leaves, one after another they pierced poignantly through the bank of sulphurous fumes. So it was I remembered England, poised on a Sicilian volcano's brim and my foot set firmly as ever before upon English earth.

So it was I returned into that dell embowered under the Purbecks I ventured upon so queerly, I do not know how many Junes ago. Great spires of foxglove rose from young bracken like cathedrals from the roofs of cities. Here and there was a solitary white foxglove where beasts and birds might come as to a shrine. The black pods still hung on the gorse, but broom was flowering into lyrics of clean gold. Streetlong trailers of wild briar connected far trees with messages. . . Orangetawny bills of blackbirds stabbed the undergrowth. Here were flowers which never bloomed before, and birds which no other man has ever heard sing. O perfect dingle, wait-

"Ask God to give thee skill In comfort's art: That thou may'st consecrated be And set apart Unto a life of sympathy. For heavy is the weight of ill . In every heart; And comforters are needed much Of Christlike touch."

With some persons the ability to truth."
impart real help and comfort to those Chris gift; others may need to acquire it has known. Not only is it healing the in the progressive manner pointed sick and the sinning, and uplifting out by the Apostle Peter, who writes: those who have been weighed down "Add to your faith virtue; and to with sorrow and oppression; but it is virtue knowledge; and to knowledge teaching men, women, and children temperance; and to temperance patience; and to patience godliness; fort to others comes through an unand to godliness brotherly kindness; derstanding of the constant, abiding, and to brotherly kindness charity.

For if these things be in you, and abound, they make you that ye shall need.

"Comfort's Art"

Written for The Christian Science Monitor

TO DOUBT everyone at times neither be barren nor unfruitful in has felt his inability to con- the knowledge of our Lord Jesus sole another in some hour of Christ." One who understands the sorrow or affliction. Suitable words nature of Jesus, and practices the have failed to come to him. The ut- mental qualities he manifested, can terances of his lips have seemed cold likewise enter into the spirit of lovand formal; even imagination has ing sympathy which comforts, heals, lost its hopeful glow. A heaviness and benefits others. Jesus knew how and gloom has overshadowed him, sorely the hearts of men are tried and inwardly he has sharply rebuked and tempted, and he longed to enfold himself for his seemingly unsympa-thetic attitude. Reason asks, Of what love. "O Jerusalem, Jerusalem," he use have been all his years of study cried upon one occasion as he looked and experience if they will not yield out upon the beautiful city, "thou him a single expression of genuine that killest the prophets, and stonest comfort to give to a fellow-man in time of distress? Like Job's com-forters, such a one can only commis-dren together, even as a hen gathererate with the unfortunate, and wait eth her chickens under her wings, until some gentle Elihu comes to and ye would not!" With what yearn-teach him that true comfort is the ing he seems to stretch forth his art of changing the current of thought hands while he calls, "Come unto me, from a material to a spiritual basis, all ye that labour and are heavy imparting positive cheer and allevi-ating pain. The importance of being greater art could there be than that able to give the right kind of sym-pathy to another has been most de-lightfully expressed in a few lines by of bringing back a lost sense of hearing to the deaf; of giving sight to the blind, or of restoring an only son to a widowed mother? Before the advent of Jesus the art

of giving the right kind of comfort to one's fellow-men had been little understood and rarely cultivated, notwithstanding the fact that one of the prophets represents God as saying, "Comfort ye, comfort ye my people," and, again, as giving the assurance, So in keeping with the Christian "As one whom his mother comforteth, cience idea of comfort are these so will I comfort you." Yet even Jesus lines that Mrs. Eddy quotes them in was not able to express to humanity closing her book, "Retrospection and all he knew of the comfort of that tion" (p. 95), where she spiritual understanding which was abows from her own personal experi-ence that the ability to comfort, heal, sciousness and demonstrated in daily and uplift others comes from an in-life; for he said, "I will pray the nate-love for God and man which Father, and he shall give you another its outward expression in doing Comforter, that he may abide with good to all who come within the you for ever." Mrs. Eddy, in "Science range of one's beneficence. The more and Health with Key to the Scripme gives of comfort and good cheer, tures" (p. 55), in quoting these words the more one has to give, and the of Jesus, writes: "This Comforter I helping hand to the sinning as well She further elucidates this idea (ibid., as to the sorrowing. He also learns p. 127) as follows: "Science is an to bring all the irradiance of experi-emanation of divine Mind, and is ence, observation, and culture into alone able to interpret God aright. It this focus of human sympathy, that has a spiritual, and not a material he may light the torch of heavenly origin. It is a divine utterance,—the Comforter which leadeth into all Christian Science today is bringing

Hollyhock Week

This is hollybook week, and the forest of gayly draped stalks flanks half the length of the long walk, overflows the corner of the bank wall, and straggles in a crowd hollow about the chicken house. The hollyhock disports all colors and tints—white, pink, cerise, crimson, apricot, yellow and blush, both with a decided pink eye and a rosily dif-

Having been let alone for several years, the single or half-double flowers predominate, and I am quite sure that I prefer them to the heavy double blossoms, whose chief charm is their solidity of form and

Louis Golding, in "Stollian Noon."

Comradery

With eyes hand-arched he looks into The morning's face, thep turns away With schoolboy feet, all wet with dew Out for a holiday.

The hill brook singe, incessant stars, Foam-fashionbed one its restless breast; And when he wades its water-bars its song is happiest.

The wood-thrush knows and follows him, Who whistles up the birds and bees; And round him all the perfumes swim Of woodland loam and trees.

His touch is a companionship; His word an old authority: He comes, a lyric at his lips, Unstudied poesy.

—Madison Cawein, in "Garden of Dreams."

The phlores that have massed themselves regardless of color, are showing bloom—white, crimson, white with crimson eye, and duil purple. Neither in color nor form are they as handsome as the young plants we set out last October, among which many new shades of cherry, salmon and rose appear.

Now are the nasturtiums rampant, and their trellis seems consumed with a flame that reaching over has caught the salvia tips. The annuals that I bought from the "Yellow Journal" catalogue are making a fine showing, having an alcove all to themselves. The first planting of giadiolus is in bloom, and I have been surprised and fascinated by the beauty of the new hybrids. Here, too, the range of color covers everything but blue, and the exquisitely shaded and veined flowers, no longer contracted and stiff, but winged and poised gracefully on the stalks, seem more like a new discovery than a development.—From "The Garden of a Commuter's Wife," by The Gardener,

STOCK MARKET CONTINUES TO RECORD GAINS

Gas, Motor and Steel Issues Are Prominent—Pools Again Active

NEW YORK, July 31 (A)-The up-NEW YORK, July 31 (P)—The upward movement of stock prices, which was interrupted by a heavy selling movement late yesterday coincident with the marking up of the call money rate to 5 per cent was resumed in today's brief session of the stock market with new leaders brought forward in the steel, motor, public utility and railroad groups.

with new leaders brought lowward in the steel, motor, public utility and railroad groups.

United States Steel common met yith heavy profit-taking around its recent high level but offerings were well absorbed while General Motors worked higher on active short covering influenced by reports that less than 15 per cent of the floating supply of stock was in brokers' hands.

The risse in local gas stocks was associated with predictions of an early and favorable decision of the socialled "dollar gas law." Youngstown Sheet & Tube assued the leadership of the steel group by jumping nearly 5 points to a new 1926 high at 90%. Nash. Studebaker and Hudson all recorded sharp gains in the motor group. Pools were active in a number of specialities, particularly Radio Corporation, Public Service of New Jersey, Woolworth and International Combustion.

The closing was firm. Trading was

Combustion.

The closing was firm. Trading was heavy for a half holiday, total sales aggregating \$00,000 shares.

Bond prices held steady in colorless trading. The best display of activity was given by Brooklyn Union Gas 5½s, which rallied more than 3 points in sympathy with the recent rise in local gas, company stocks.

Price movements of railroad liens were again mixed, moderate advances in Erie general 4s and Denver & Rio Grande Western 5s contrasting with the heaviness of Frisco adjustment 6s and Chicago & Eastern Illinois 5s.

IMMEDIATE OUTLOOK GOOD, SAYS EXPERT

NEW YORK, July 31—In a discussion of the business situation, Dr. Lewis H. Haney, director of the New York University Research Bureau, In this week's Textile World, says that the outlook is for continued good general business during the next few months, but that the period beyond that is highly uncertain.

He says:

that is highly uncertain.

He says:

"While no serious industrial maladjustments have appeared and accordingly there are no indications of any severe decline in business ahead, something is lacking. The markets lack punch. On the average the demand for goods is not strong.

"As we size up the situation it is that industry has long been geared up to meet a rather extraordinary volume of domestic and foreign requirements that has existed most of the time since the war. Gradually these requirements have been satisfied.

Building activity, which has been

have been satisfied.

Building activity, which has been one of the underlying sources of strength in commodity markets, has caught up with demand and is declining. The total production of automobiles threatens to become excessive."

WHEAT PRICE TREND UNEVEN

By the Associated Press

CHICAGO, July 31—With no re-lief in sight for Canadian hot weather and drought, the wheat market here showed an early upward trend today, but buying failed to become aggres-sive and the advance was soon more than wiped out.

than wiped out.
Starting at ½c off to 1½c up, wheat
prices fluctuated erratically within a
range of about 2½c. Corn, oats and
provisions were easy, corn starting unchanged to ½c lower and subsequently
sagging all around.
Opening grain prices follows: When

WEEK'S REVIEW OF EVENTS IN STOCK MARKET

General Motors and United States Steel Leaders-Money Still Easy

NEW YORK, July 31 (Special)—General Motors and United States Steel by their sensational advances were the outstanding features of the stock market this week. There has been much speculation as to what group of individuals or perhaps financial institutions were behind the tremendous trading in these issues but it would seem more logical to attach special importance to the splendid statements of earnings made public during the week by both corporations. Not long ago it was claimed in the financial district that decidedly unfavorable conditions were developing in the motor industry, which were likely to prove to be the forerunner of a period of depression. Somewhat similar rumors were circulated relative to the steel trade.

The figures announced by both corporations clearly showed that there was no ground for the rumors in either instance. In fact, the earnings of both corporations were considerably better than the most optimistic observers in Wall Street had expected. No one had looked for the General Motors Corporation to show earnings for the six months of more than \$17 a share, and even United States Steel earnings for that period in excess of \$8 a share occasioned some surprise.

Rallroad Earnings Large

e surprise

Railroad Earnings Large

Yesterday afternoon the bears at-mpted to drive prices of stocks down. They did not do so because of unfavorable news, but because of the rapid rise that stocks have had under the leadership of General Motors and United States Steel. Their efforts were rewarded with moderate but only temperature of the states of the states

rewarded with moderate but only temporary success, as those two issues and other active industrials rallied several points each on the average before the close of business.

Until yesterday rallroad stocks acted in a rather disappointing way, in view of the distinctly favorable statements of earnings made public during the week for June and the first half of the year. Certainly no one has occasion to be pessimistic over the railroad situation because of the exhibits wade by the actual returns for those the year. Certainly no one has occasion to be pessimistic over the railroad situation because of the exhibits made by the actual returns for those two periods or because of an unfavorable outlook for the rest of the year. On the contrary loadings for July have averaged well above those for the corresponding month a year ago. Railway executives as a whole are looking for the movement of a big volume of traffic throughout the autumn. Railroads physically and financially are in better shape in most cases than even before.

are in better shape in most cases than even before.

Up to recently there has been a lack of speculative interest in the railroad shares. Bankers who are familiar with the general question of railroad consolidation, and likewise with individual plans that have been underway for some time, maintain that the reason is to be found largely at Washington. Speaking more specifically, they mean that the direction of the railroads is so controlled by the Government that investors have decided that there is little chance for them to get more than a moderate return on their investment and that speculators feel that opportunities for wide swings in railroad shares have been largely taken away.

Money Slightly Firmer

The figures as to carloadings and actual earnings so far this year furnish all the evidence that anyone could ask for as to the volume of business being handled by the railroads and the degree of prosperity existing in this country. Such a situation, it would seem, is bound to be reflected in due time in the market for railroad securities.

time in the market for railroad securities.

Money continued extremely easy throughout the week. There was an advance in the rate for call loans from 4 to 5 per cent yesterday. This, however, was regarded logical in view of the fact that for two days in succession the transactions in stocks on the New York Stock Exchange alone were far in excess of 2,000,000 shares.

Yesterday was the last day of the week, and likewise of the month, for the arranging of loans. Brokers had to take care of their accommodations until next Monday morning, while corporations had to finish their preparation for the large interest disbursements that they will make at the same time. Most authorities, while admitting that the tone of the money market may be firmer during the next two or three months, do not look for anything approaching stringency.

BIGGEST BAKERY IN SOUTH FOR MIAMI

MIAMI, July 31—Seybold Baking Company will break ground Aug. 1 for a \$1,500,000 plant in N. W. Twentieth Street, to be the largest baking unit in the south, according to Harry D. Tipton, president of the Southern Baking Company, of which Seybold Baking Company is the Miami subsidiary.

The new plant is expected to be ready for operation by Nov. 15. Capacity will be 250,000 pounds of bread aday. The company will also have new plant in Daytona Beach and Tampa. Stock of the Seybold Company will be increased to take caré of the building program and enlargement.

BARNET LEATHER PROFIT

Barnet Leather reports for the quarter ended June 30, 1926, net profit of \$83,750 after depreciation and federal taxes, equal, after 7 per cent preferred dividend requirements, to \$1.65 a share earned on 40,000 no-par shares of common. This compares with \$75,074, or \$1.43 a share, in the preceding quarter and \$49,958 or 59 cents a share, in the second quarter figures. Net profit for the first six months of 1925 totaled \$168,784, equal to \$3.09 a share of common, compares with \$118,406, or \$1.65 a share of common, in the first half of the previous year.

DURING WEEK

Early Weakness Followed by Irregular Strength -July Corn Weak

Special from Monitor Bureau CHICAGO, July 31-After showing onsiderable weakness late last week on heavy profit-taking, wheat worked irregularly upward the last few days, with buying stimulated by the builish estimates of the Canadian crop. Selling based on the expectation of a lull in the milling demand proved unprofitable, as cash premiums have either held steady or advanced relative to the futures. the futures. Recent estimates of the Canadian

Recent estimates of the Canadian northwest crop range from 279,000,000 to 315,000,000 bushels. It appears to be the general opinion that the Dominion crop has gone back decidedly since the Government estimate of 327,000,000 bushels was fewered. ishels was issued. Since then there has been a perio

on the crop. As the government re-port itself was considered bullish, any figure under 327,000,000 bushels natur-ally is looked upon as a reason for hunter wheat buying wheat.. Winter wheat receipts in this coun-

try for July have smashed all records but the significant feature of the doheld relatively strong with the milling demand continuing. Export sales have

great has been the call for wheat that I premiums have easily been maintained, and recently prices at the gulf have I hardened, in spite of the fact that there is a blockade at Galveston.

Foreign news cables have reported a better demand recently for spot wheat, and the foreign statisticians continue to place stress on the extremely light stocks and especially light offers from this country. Europe undoubtedly has been disappointed in the amount of twheat that has been sold from this country.

Apparently importers abroad have not been disclosed to compete for the offerings in our southwest with the mills who have taken advantage of the tremendous movement to lay in big supplies. The fact that the spring wheat promises to have a small crop with much light wheat, has been a big factor in determining the attitude of the northwest mills.

Outside interest has continued of

of the northwest mills.
Outside interest has continued of moderate proportions, and the market has yet to demonstrate a capacity for absorbing the realizing sales.

Corn riches were a transported by the control of th

absorbing the realizing sales.

Corn prices were strong much of the time, with July however turning weak late in the week, going to a discount of \$4 cents under the September. The trade fear taking delivery of corn because of the reported quality of the grain, 65,000 bushels having been reported out of condition so far. Deliveries have not been heavy recently.

Quits have been inclined to drag, and rye has also been a little easier relatively. World's crop of rye is estimated at \$15,000,000 bushels compared with 1,005,000,000 bushels a year ago.

A. M. BYERS INCOME

A. M. 1yers Company consolidated not income of 4280,222 after depreciation, in-terest and federal taxes for the quarter ended June 30 is equal, after 7 per cent preferred dividends to 31.35 a share on 180,000 no-par common shares, compared with 4426,692, or 32.32 a share, in the previous quarter and 5364,403, or 31.93 a share, in the quarter ended Dec. 31, 1925.

CHICAGO, July 31—Sales of United States Stores Corporation for the first two weeks of July were \$1,327,478, compared with \$1,272,368 in the like period fast year. Sales from Jan. 1, 1926, totaled \$18,429,099, compared with \$17,524,—\$40.

NEW YORK

BRADSTREET'S SEES FURTHER TRADE GAINS

NEW YORK, July 31 (P)-Brad-

With a slight improvement shown in both wholesale and retail trade, and a small but preceptible gain the speed of industry noted as manufacturing emerges from mid-year quietness, two lines of products—cotton goods and steel—stand out as furnishing about the best reports as to buying.

Steel trade authorities report a small gain in capacity at mills, with July

gain in capacity at mills, with July buying and production not far from the best on record for that month. Cotton goods have been bought quite confi-dently for four weeks past, and a further slight gain in price strength is noted this week, whereas steel and iron prices have not greatly changed.

The strength in cotton, it may be noted, has come just as a year-long decline in the raw material seems to have culminated. The shoe trade also

TRAFFIC LIGHT

Traffic through Cape Cod Canal during the first six months of this year continued light. Figures of vessels, tonnage and cargo all exceeded those of the 1925 half-year, but compared very poorly with those of previous

very poorly with those of previous years.

All-rail shipment of coal and the use of coiliers too large to pass through the canal have been factors in the decline of the Cape Cod Canal, as well as duliness generally in the coastwise shipping business.

In the first six months of this year 2100 vessels passed through the canal, aggregating 1,406,639 gross tons. This compares with 2018 vessels and 1,154,-137 tons in 1925.

Cargo tonnage increased nearly 75,-000 tons from 271,881 in the first half of 1925 to 345,656 in the first six months of this year, but is considerably below the next lowest six months' period, 339,520 tons in 1924.

Sprinters and Divers Perform in A. A. U. Title Swim

Meet in Philadelphia

Meet in Philadelphia

PHILADELPHIA, July 31 (P)—
Sprinters and divers take the stage in the final events of the Amateur Athletic Union of the United States swimming championships here today. With three world's swimming records shattered and two others already established in the three days' competition, the meet has already set a standard never before reached in national competition.

The assault on the records will be continued in the 100-meter swim and the half-mile relay, originally carded for yesterday, but switched in an eleventh-hour decision by the committee in charge.

John Weissmuller, star Illinois A. C. sprinter, is favorite to turn in his second triumph of the meet in the 100-meter with his teammates favored to set the pace in the relay. With the exeption of Arne Borg, Weissmuller will have little opposition in the short dash. The 15 and 30-foot diving events were also down on today's program.

Borg's performance in the half-mile and mile, in both of which he shattered the world's mark, stamps him as one of the greatest swimmers of the time. The Swede will start agains one of the greatest swimmers of the world's mark, stamps him as one of the greatest swimmers of the world's mark, stamps him as one of the greatest swimmers of the world's mark, stamps him as one of the greatest swimmers of the world's mark, stamps him as one of the greatest swimmers of the world's mark, stamps him as one of the greatest swimmers of the world's mark, stamps him as one of the greatest swimmers of the first time last year and was won by Miss Ryan has now an equal standing for permanent possession, but three tournament victories are for today's march follows:

Keen Competition Assured

Keen Competition was promised in the program of the start agains and the program of the start agains and the program of the first time last year and was won the first time last year and was won the start agains and the program of the first time last year and was won

Keen Competition Assured

Keen Competition Assured
Keen competition was promised in
the springboard events which will be
teld at Media, outside of Philadelphia,
t the completion of the races at the
sequicentennial pool.
David A. Fall of Leland Stanford
inversity, was favored to fight it out
ith Peter Dejardins of Miami, Fla.
t both the low and high-board events,
oth are Olympic point-winners in the
124 Paris meet.

Both are Olympic point-winners in the 1924 Paris meet.

Borg continued his record-breaking performance yesterday by clipping 47 3-5s. from the mile mark in the outstanding performance of the meet. He swam the mile in 21m. 46 2-5s.

Walter Spence, the Brooklyn Central Y. M. C. A.'s versatile aquatic star, set a new record when he negotiated the 330-yard medley swim in 4m. 2.5s.
De Lardins, present national outdoor.

DeJardins, present national outdoor and indoor fancy diving champion, re-tained his championship in the 10-foot

platform diving tests, scoring the highest point total ever made in a national

Borg's Work Remarkable

Borg's performance in the mile swim istory of American swimming. Using combination American and Austranan crawl stroke, ne won the even by a margin of almost 125 yards. Harry S. Glancy of Philadelphia, unattached, was second, and Clarence Ross of New York A. C., third.

Spence emulated Borg's double vices and the strong strong

ory in the meet by winning the 330-ard medley, after winning the 440-ard breast stroke Wednesday. The Brooklyn star built up a big lead in the breast stroke and then stepped out increase his lead in the freestyle. ence's mark of 4m. 25 2-5s will be tered in the annals of sport as an American record, as no present record

Walter Laufer of Cincinnati finished second to Spence, five yards astern. Warren Kealcho of Honolulu was

warren Keaicno of Honoiulu was third.

One Mile, Freestyle—Won by Arne Borg, Illinois A. C.; Harry S. Glancy, unattached, Philadelphia, second; Clarence Ross, New York A. C., third; Joseph Farley, New York A. C., fourth. Time—21m. 46%s.

Dr. George T. King and W. M. Washburn defeated Zenzo Shimisu and Takelichi Harada, 6—2, 13—11.

METROPOLITAN JUNIOR SINGLES

—Third Round did not allow a hit. Nienois is the champions' new pitcher from New Haven. The Phillies made only six hits but Kremer's nine bases on balls and Pitts-burgh's two errors stood out prominently. The champions' only run was a home run by Cuyler. As a result of their defeat they are now only one-half a game ahead of Cincinnait. The score:

BROOKLYN'S RUN BROKEN

BROOKLYN, July 31—A pleshers' duel resulted in a victory for Brooklyn over Chicago, here yesterday, 4 to 1. Both had lost two straight games when they met, and Brooklyn's run was broken, while Chicago's was extended to three straight. The pitching of Grimes, who allowed six hits, was the game's feature. Shortstop Butler knocked in two runs on his double and single. The score:

RUTH'S HOME RUN HELPS YANKS
ST. LOUIS, July 31—Ruth's thirty-second home run of the season in the second inning, seoring Gebrig, also enabled the New York Yankees to make a clean sweep of the four-game series against St. Louis here yeaterday, and increase their winning run to nine strasile at game. Lying up the score in the fourth after the Yankees had secured an five-run lead and in the tenth, scoring one run to the the count once more and force he game into another extra in the lather crews led until after two runs in the tenth on two singles and a bad error. Four errors by the losers helped things for the Yankees. Ruth, however, was not the only one to hit a home run for Paschal and Williams did also. PICK-UPS

in Batting

The leading teams in both major leagues increased their batting averages this week, while their nearest contenders lost a bit. The New York pressed with the wronguluness of teams are reserved to the incurrent of the

ting, as he made 13 hits in the last seven games, and moved from seventh to fifth place in the leading 16 hitters of the National League. Lester Bell of St. Louis kept a step ahead of him, with 14 hits in seven games, to win fourth place. Seven of Bell's hits were for extra bases, two being home runs. Hargrave, Cincinnati catcher, easily held his leadership of the league in batting, gaining four points to reach 332. Stephenson, the new Chicago Cubs outfielder, moved in between Hargrave and his Red team mate, Bressler, to take second place, as Bressler had an off week.

WELFARE WEEK HELPS ANIMALS

Educationists Debate on Best Methods of Teaching Kindness

Species from Monitor Bureau

By D. M. NORTHCROFT LONDON—Animals' Weifare Week, postponed on accoupt of the general strike, recently concluded its session in Essex Hall here. Protests against hunting wild animals, imprisoning them in cages, catching them in pain-ful traps, transporting them in ships to be slaughtered on landing, with a plea for humane slaughter, registered.

A meeting for teachers and other educationists was also held on the subject of "Animals' Welfare and the School Curriculum." C. G. Ammon. who presided, observed that today there is a stronger volume of public opinion against cruelty than was the case in past days, and human nature was becoming more sensitive in this respect. The big fight in the future would be in connection with the use of animals for medical research, when humanitarians would be up against the strongest "trade union" in the country, compared to which the Miners' Federation was neg-ligible. The only way to win in this contest was by promoting public en-

lightenment

Early Teaching Necessary Miss Evelyn Sharp maintained that children needed to be taught the right attitude toward animals from their earliest years, since such teach-ing was seldom satisfactorily ac-quired later. Kindness to animals was never objected to in theory by necessary to inquire into what "Kindness" really implied. Fox-hunters, for instance, were often ex-tremely kind to animals.

Justice to animals, however, was an entirely different matter, and it was only on this basis that true kindness could be taught. Children needed to learn that animals had rights, and the idea of mastership For .300 Again must be driven out of the youthful mind. Pet animals should be looked upon as companions. There was too much sentimentality going about with regard to kindness to animals, therefore the inculcation of justice

Yankees raised the team average back to an even 300 in official figures, while Pittsburgh gained three percentage points on the losing Reds.

Traynor seems to be responsible for most of the Pittsburgh gains in batting, as he made 13 hits in the last even games, and moved from sevents of wild animals in the snow, and children learned to follow the tracks of wild animals in the snow, and they also tended any wounded ani-

sympathy with humane teaching, by a special mention of the need for inculcating kindness to animals in Article 2 of the Code of Regulations.

With E. S. Stimpson

NAYAT. R. I., July 31 (P)—E. S. Stimpson of Brae Burn and F. C. Newton of the Country. Club played their amateur golf tournament here year way to the finals of the New England terday. Stimpson, in the semifinals defeated Herbert Jaques of the Country. Club, 3 and 2, and Newton put F. M. Hancock of Metacomet. Rhode Island. State champion, out of the running. 2 and 3.

Play yesterday on a course made sorgy by rain was featured by Newton's victory over Jesse P. Guilford of Woodland in a struggle which required 23 holes of play for a decision. NEW ENGLAND AMATEUR GOLF CHAMPIONSHIP—Third Round E. S. Stimpson, Brae Burn, defeated P. H. Wray, Wannamoisett, 1 up. Herbert Jaques The Country Club, defeated H. B. Rust Jr., Wannamoisett, 5 and 6.

P. H. Wray, Wannamoisett, 1 up. Herbert Jaques The Country Club, defeated H. B. Rust Jr., Wannamoisett, 5 and 6.

Cayler Leads Base Stealers

Cuyler of Pittsburgh dropped out of the first 10 hitters but stole three bases kis week leaving his rivals well behind with a total of 22. Bottomley of St. Louis failed to hit a home run this week, but his total of 14 home runs still leads the National League. Bell's two this week gave him 11 and southworth, sent to the Glants by St. Louis, also got two, to make 11. Williams of Chicago tied with Bottomley, also failed to connect for a home run this week.

Brown, Boston outfielder, is the new face in the leading 10 hitters this week, care him 12 and 6.

CHINA BUYING MORE LUMBER

Shipments From the Pacific Coast Reported to Be Increasing

American lumber, especially the Pacific coast varieties, is being bought in large quantities by Thinese consumers for use in erecting new houses and office buildings in Shanghai and other protected "treaty ports," to house the people who are coming in to those places from the interior, according to James H. Smiley, assitant trade com-James H. Smiley, assitant trade com-missioner, who has just returned to Boston from his station at Shanghai.

Mr. Smiley was st tioned at the oston office of the United States Bureau of Foreign and Domestic Commerce for a year, in 1921, and is now starting an itinerary of calls at various cities of the country to aid manufacturers and exporters in trade problems relative to China. While the exodus of wealthy

Chinese business men to the treaty ports, which followed the military activities in the interior, has brought aditional capital and business to those centers of commerce, the road building policies of the military leaders will improve interior communications, thus ameliorating the adverse conditions which have been caused by the absence of efficient transportation facilities, he said.

Demand for Leather Goods Consumption of American, particularly New England, leather in China is slowly increasing, he said, one cause for which is the adoption of Western style footwear in China. native Chinese find that Ameri can leather wears well, gives satis-factory service, and is highly desirable during rainy seasons. He

From an industrial point of view, there appears to be no prospects of immediate development in China, outside of the treaty ports. The military parties constitute the retarding forces. The desire of a Chinese industrialist to establish a cotton mill, a power plant, or any other form of enterprise is discouraged by the imminent possibility of having his business subjected to exorbitant taxes by the military commanders in his district.

"In the treaty ports, the situation is different. There, money may be invested with the assurance of protection with reasonable returns for expended effort. Flour mills operat-ing in these foreign settlements have just completed a successful year and able for transient and permanent guests. many of the owners already have completed plans for new mills and enlargement of existing establishments. American producers of such machinery have an opportunity just now to sell their goods there. "An important and interesting fac-

tor in the economic and political structure of China is the student— "Young China." These future bustness men have acquired western ideas of progress and undoubtedly exert a powerful influence upon the future economic life of the country. While chaos still is apparent in the life of China, the continuance of trade and business is reassuring: and in the progress which is expected to accompany a return to normal con-ditions, the methods and ideas of "Young China" may be expected to play a leading part.

Changing Conditions

"Only the adaptability of the Chinese merchant to changing and un-certain conditions has enabled him to maintain his business, though the more recent interference of the military have necessitated the conduct of that business on a hand-to-mouth basis. This also tended to prevent undue expansion, resulting in the slow progress of Chinese trade, in spite of the adverse circumstances

which affect it.

"Although the construction of roads in the interior by campaigning militarists undoubtedly will have a beneficial effect upon the country's transportation in the future, the present transport conditions consti-tute one of the most adverse factors in China's situation. Railroad service is spasmodic and entirely under the control of military authorities who deem the transportation of troops of much more importance the movement of merchandise

"Rolling stock is scarce, the revennes of the railroad lines for operating expenses have disappeared, and there are few funds available for maintenance. Nevertheless, the foreign trade of China has been maintained at a remarkably high level Imports in 1925 have declined some what, with exports showing a corre sponding increase. This ability to sustain trade in the face of severe obstacles is a commentary upon the trade virility of China."

Public Story Tellers Amuse Chicago Children

Special from Monitor Bureau CHICAGO—At a rustic pavilion on the east side of the North Pond in Lincoln Park here, expert story tellers from the Chicago Pub-lic Library gather groups of chil-dren about them and hold their interes; in tales of wonderment and stories of struggles of mankind to reach his present state and with other stories of progress and inspiration. This ancient art is practiced by the library folk every Friday afternoon at the pavilion.

EDITORIALS

If by chance any of the distinguished speakers and interested visitors at the Williamstown

A New Point of International Accord

Institute of Politics sessions, which began a few days ago, were ap-prehensive lest there might be a dearth of entertaining subjects proposed for discussion, they probably were re-assured during the first

hour of the conferences when Dr. Charles K. Leith, head of the department of geology at the University of Wisconsin, and a man of recognized eminence in his profession, proposed measures which, if adopted, might put an end to what he described as world monopolies of essential raw materials. Dr. Leith's view of the subject is not merely academic. He is a practical as well as a theoretical geologist. To his experience in the field has been added that gained as mineral adviser to the War Industries Board of the United States during and following the period of the war.

In a comprehensive survey of the situation, in which he evidently sought to impress, early in the discussion of the subject, its economic importance, the speaker insisted that a worldwide freedom of search for new mineral deposits is necessary to make up for depletion of present known supplies. He reminded his hearers that today much of explorable territory is "behind closed doors." He urged that steps be taken to provide an open field for exploita-tion and experimentation. Failing to bring about complete international accord along this line, it was made clear that the British Empire and the United States, which control a large part of the world's natural resources, might profitably reach a common understanding in respect to their noncompetitive development.

There exists, undeniably, what might be termed a natural monopoly of mineral resources. This is fostered, logically, by the narrowing of political boundaries. The rapid expansion of commercial control of what are regarded as basic industries seems to demand the breaking down, by some friendly process, of the political or national barriers which have been interposed. "We are, therefore," Dr. Leith declared, "witnessing the mighty conflict of two powerful opposing forces; on the one hand, world demand for materials, which knows no political boundaries and which is forcing unification in order that demand may be efficiently satisfied; on the other hand, the nationalistic forces directed toward partitioning resources for national gain or security. Many recent political changes and difficulties, national and international, are an expression of this conflict, and more are in store. There seems to be no way to eliminate either set of forces. The problem is to effect some kind of balance or adjustment between them.

The importance of the whole matter is emphasized, of course, by the steady increase in the demand for minerals of all kinds, especially oil, iron ores, and nitrates. This makes necessary constant exploration, many years in advance, to insure against depletion of available supplies. Dr. Leith was careful to admit that his own country is, at present, the chief advocate of the "open door" policy which he recommends. This is so, at least in part, because it has had more experience in this field than any other nation. It has developed capital, skill and impetus; it has smelting and fabricating plants requiring continuous large supplies of minerals; is depleting its own resources faster than any other nation, and must project its activities abroad to secure needed supplies. Dr. Leith observes, somewhat parenthetically, that the mineral lands of the United States have for the most part been open for explora-

tion or purchase by citizens of other nations. Viewed broadly, however, the problem is a world problem, rather than one in which the people of any single country are selfishly concerned. There cannot be complete co-ordination of effort in the undertaking to supply the world's needs until there is a more or less equal sharing of those natural resources whose monopolization seems to have been artificially aided by the assertion of claimed nationalistic rights. Surely, as between the British Empire and the United States, there is no excuse for continuing this traditional bar.

If the housing situation in the larger American cities is far from satisfactory to the tenants,

Philanthropy and the Housing Problem

who must pay high rentals for inadequate accommodation, it is not for lack of knowledge of the factors entering into the problem of creating a greater supply of habitable dwellings. For more than a generation

the housing conditions obtaining in the great centers of population have been studied by private and public agencies, and attempts have been made by regulatory laws and commissions to abolish the unsanitary structures that at one time were regarded as fit shelters for the multitude receiving small incomes.

Along with the efforts to prevent by law the construction of inferior types of dwellings, experiments have been undertaken in some cities with the erection of what are termed "model tenements," the capital for which was furnished by charitably inclined persons who were willing to accept a low return on their investment. These buildings have at least shown that it is not necessary to deprive tenants of light and air in order to realize a fair profit, but as they have accommodated merely a handful of the teeming city dwellers, it cannot be said that they have effected much improvement in general conditions.

Private enterprise having failed to provide a sufficient supply of dwellings for the great majority of persons who are unable to pay high rentals, it is not surprising that some well-intentioned persons should have turned to what is so frequently thought of as an infallible source of wisdom-governments-for assistance. Forgetting, or ignoring, the essential fact that a government has no money except what it takes

from the people by taxation, or borrows on bond issues, various projects have been launched for state aid for housing construction, and even the Federal Government is being urged to engage in a home-building policy involving immense expenditures.

Whether these departures from the longestablished policy of abstention from competition by government with private industry are justified, is a question requiring the most careful investigation and consideration. It is conceivable that the enormous supply of idle capital now seeking profitable investment can be attracted to providing better housing without governmental interference. Philanthropy has not solved the problem. Is there any reason for believing that state or national aid would have any better results?

Dismissal of Gregory Zinovieff from the political bureau of the Central Executive Com-

How Stable Is the Russian Government?

nist Party is one bit of news from Russia that should cause deep thought. Zinovieff was a close associate of Lenine. At the same time dispatches told of the dismissal of Mr.

mittee of the Commu-

Lashevitch as Assistant Commissar of War and alternate member of the political bureau. Probably the most interesting fact in connection with these events from the American point of view is the apparent ease with which the Soviet authorities are able to censure their critics or to get rid of them. The world has not forgotten the discipline to which Trotzky was subjected not so many months ago. It would seem that the political tactics which were ushered in at the passing of Lenine-tactics which are obviously designed to maintain the governing clique in authority by virtue of force-have not been abandoned nor modified much.

Russians should not be unmindful of the effect that this is having upon the outside world. Most people are not willing to submit to such personal domination. Because of similar tactics, the old régime in Russia was only too frequently subjected to harsh criticism. And it must be remembered how Woodrow Wilson before the Congress of the United States hailed the passing of Tsarism and welcomed the "new democracy" of Russia. That was, however, before the downfall of Kerensky and before a stable government was assured to follow the Tsar. Ever since, the world has been asking, 'How stable is the Government in Russia?" and 'Will it continue in power much longer?" Upon an answer to these questions has depended much. But it is not enough to demonstrate to the world the power of certain men to continue in authority as evidence of the stability of a government. A government by force of human will has not the permanence that is desired, even though it may have continued a few years. Tsarism also continued in power for a long period by sheer force of will, but it failed to win the confidence of the Russian people or the sincere good will of liberty-loving nations.

To some it may be difficult to understand why the Russian people will submit to even such a measure of domination as is today exercised by the Soviet authorities. That is because the nature of the Russian people and of the organization perfected by the Soviets is not fully understood. From the English press only recently has appeared the 1926 Soviet Union Year-Book. In this is printed the text of the Constitution adopted on July 6, 1923, about which time the so-called "new economic policy" was adopted by Russia. Under this Constitution the executive authority of the Soviets has been built up and an organization perfected which is calculated to continue the personnel of the "inner circle."

One thing only need be noted. The six Soviet federated republics into which Russia has been divided are given autonomy. Almost each one of the allied republics is divided politically and administratively into a number of autonomous republics and areas, and administratively into provinces, districts, nezda, volosts, villages towns, etc., and the six in turn combine into the supreme state, the Union of Socialist Soviet Republics, the U. S. S. R. The Central Executive Committee of the Union, which is in effect the party, elects (quoting the Year-Book) "according to the number of united republics, four Presidents of the Central Executive Committee of the Union of Socialist Soviet Republics from among the Presidium of the Central Executive Committee of the Union of Socialist Soviet Re-

These four Presidents serve in rotation, three months each, as head of the central body. In such manner is the political authority of the state pyramided. The concentration of governmental, of economic, of educational, of financial and even, if possible, of spiritual authority by such manner constitutes the tactics whereby the Soviet authorities endeavor to insure the stability of their government. If a man dissents he is dismissed. It is hardly the kind of stability the world hopes for.

Probably there never was a time when the public needed more protection from unscrupulous users of the mails

Protecting the Investing Public

purporting to offer for sale merchandise of all sorts and condi-tions, than the present. And consequently there never can have been a time when the position of the solicitor of the

Post Office Department of the United States would have been more important than today, when, as Horace J. Donnelly, the gentleman in question, has estimated, more than a billion dollars a year are lost to unscrupulous confidence men, whose special forte is extracting from the public its available funds under specious pleas of offering exceptional values in

Of course, the schemes with which Mr. Donnelly's office comes in contact are many and varied. As a recent description of them put it, they run from simple catch-penny sales schemes, to gigantic investment deals involving millions of dollars. And certainly it is no place here to consider these projects in detail, but it is of interest to learn that apparently, be they

large or small, cheap or costly, most of them come sooner or later to that little oak-panneled office tucked away on the fifth floor of the enormous gold-gray stone Post Office Building on Pennsylvania Avenue, in Washington, D. C. For this fact carries with it the assurance that after all honesty is the best policy, and that though "the wicked" spread "himself like a green bay tree, yet he" passes "away, yea, I sought him, but he could not be found."

But all of this discussion overlooks an aspect of the situation that is only too often ignored. While it is true that primarily efforts must be directed toward putting a stop to the activities of those unscrupulous individuals who make it their business to obtain money and goods under false pretenses, it must not be forgotten that an almost equally important side of the question involves the individuals who allow themselves thus to be imposed upon. No matter how plausible may be the method of advertising employed, a sufficiently keen discernment would enable the victims to detect the dishonesty of intent. Instead, therefore, of spending time in deploring the fact that so many schemes of questionable nature are being foisted on the public today, as certain are in the habit of doing, it might be more profitable if that time were spent in learning methods to descry them. While it will, of course, be granted that the protection of the investing public must necessarily include methods to prevent unscrupulous persons from imposing upon the public, it should be remembered also that that public has something to do itself, to render the protective work more effective and

Revision of the orchestration of classic composers, which was formerly regarded as an

Retouching

the Classic

Scores

impertinence, seems to have become with certain conductors a more or less consistent practice. Changes which Gustav Mahler, as conductor of the Philharmonic Orchestra, made in the scores of Beetho-

ven, aroused critical disapproval of the most vehement sort. On the other hand, quite a thorough restudying which Frederick Stock, conductor of the Chicago Symphony Orchestra, has made of a work by Schumann, meets with acceptance.

Mahler undoubtedly used great skill and good judgment in modifying Beethoven's instrumentation, and Mr. Stock has certainly shown technical mastery and artistic common sense in his overhauling of Schumann's, in respect to method and procedure, then, the two men are together. But Mahler undertook his enterprise of emending an old document before the war: Mr. Stock his, after it. In point of time and temper, therefore, they stand apart.

It was once regarded as merely interesting that Beethoven, because of the mechanical stiffness of instruments in his time, perforce wrote passages for trumpet in a rather cramped manner; and that Schumann, because of his want of schooling as a tone colorist, painted in daubs and blotches. To do anything to improve affairs was no more to be thought of than to alter historical or biographical facts. But conductors have overcome objection by argument of applause. They have retouched and they have rehabilitated; and audiences have been glad at the outcome. They have newly spiced this master's philosophy, and they have freshly sweetened that one's sentiment; and the public has expressed pleasure in the treat.

The devices for the reform of classic scores militate not, presumably, against truthful presentation of the composer's message. The lines of the architecture remain, though the ornament has been brightened. If Beethoven, who lacked present resources of sonority, can be brought to date with a note of brass and a tap of percussion, and if Schumann, who lacked knowledge of combinations which every graduate of an orchestral class understands today, can be put right by a little reorganization strings and wood, conductors evidently believe the thing should be done. Modern listeners crave idea. But they must have sound.

Random Ramblings

The tremendous growth of the automobile industry has been given as a reason for a number of whip concerns going out of business. Official figures, how-ever, show that in the United States there are now humane organizations were a larger contributing cause for this condition than is generally recognized.

In the "floating university" or round-the-world college, should the upper or lower classmen be assigned to the first-class cabin? Could not it be-called truth-fully a "salt water college"? And what about the freshmen? Would the seniors be "old salts"? These are grave questions for the student body to consider

It has been said that courtesy costs nothing, but the toll on the word "please" in telegrams sent in the United States amounts, according to the Dearborn Independent, to \$10,000,000 annually.

With the fall congressional elections not so far dis-tant, it will be no time at all now before aspirants will be, as Andrew Johnson first said in 1866, "swing-ing round the circle."

Will historic pageants of a hundred years hence make the bobbed hair and Charleston of the sedate 1920's as attractive as the powdered wig and minuel

Those who have a sense of "being up to their necks in hot water" can learn a lesson from the teakettle. It is when it gets in this predicament that it begins -

The one-time indispensable hatpin seems to have gone the way of the bootjack that grandfather always kept handy. Motoriets usually discover what causes the wheels to revolve upon paying their gasoline bill.

The time is here when one doesn't have to be a corporation to cut a nice juicy melon.

Comfortable "quarters" in a modern apartment may be only "sixteenths."

In the Light of the Lemons

T WAS near Palermo. He was sitting above the city in the light of the lemons; and so was I. "Stranger things have happened," I thought. "It may well be he: Filippo or Ricciotti, one of them. In such a place as

he: Flippo or Ricciott, one of them. In such a place as this anything might happen."

All I could see of him was his high, soft green felt hat pinched in the crown, his shoulders leaning against the bank, his small legs stretched out before him and the

sunlight gleaming on his yellow, cloth-topped boots. He lay there, either asleep or awake, a stranger to me. I was sitting well above the lemon grove, but the light of the lemons was on his face and on mine. This light is an emanation from a myriad simple moons. The sun lights

The groves lay yellow laden in long green corridors opening to the amethyst sea. They banded that coast of looping, surf-marged bays. And behind them the mountains rose in limestone, at times in iron promontories from the jeweled sea itself; and at times rising lava gray and sun-eaten from the green stairs of the terraced valley hills.

Palermo lay in chipped shell white in a hollow beneath us. Its roofs were red as pumpkin rinds, coarsely grained by that tremendous sunlight. Its walls had a white and

by that tremendous sunlight. Its walls had a white and porcelain comeliness. And the long hot fields of Mediterranean sea blossomed into a rare foam on its strand. In the blue heat I could hear the thick banging of a bell's tongue in some hot belfry with the sky in its arches. In the dense sunlight I heard the voice of a ship leaving the harbor, an irou shaft of sound.

"With Filippo's shumac aboard, who knows!" I thought.

And always against the royal sea, the naïve and moonlike bodies of the lemons glistened in the foliage of the groves. It was a blue world; an air, a sky, a sea, a life of sun and amethyst. Anything might happen in such a place, I thought. He might be Filippo. Why not?

Fancy took me back to those gone days when it was my lot to be in a leather broker's office in Bermondsey.

Leather brokering was a dismal business there. Fog and ledgers. Fog and skins, almost endlessly, it seemed. But one of the happy events that used to enliven us was the fortnightly letter from Filippo and Ricciotti, shumae merchants, Palermo.

When the postman put that bright blue envelope on the counter it was as if the fog had lifted, as if a patch of southern sky had been delivered to us. From the office boy—who giggled intuitively even before he saw the letter—to the junior clerk, from junior clerk to the clerk, from the clerk to the cashier, the signals ran.

Even the partners would smile as one of them slit open the envelope, and Filippo's sharp, mauve handwriting announced:

announced:

Esteemed Sirs:

We humbly beg to warn your honourable House that we come from expediting this day 200 bags of shumacs at the packet boat "Florio," splendid quality. The market here expresses a profound animation—.

Concluding with the customary, "We agree, Gentlemans, the assurance of our most gracious salutes." The letter was signed, first by a rubber stamp; secondly, by Ricciotti, whose signature-was like an eruption of Etna and flowed down like lava; and lastly by Filippo, whose name flashed in one sharp, thin flash of inky lightning across the page. across the page.

How gay we were-and not with that strained, threadbare, office gayety—about those funny little fellows and their precious shumae. Little they knew what happiness they brought us. We could almost feel their beneficial sun, feel Palermo's lambent blue. For the rest of the day we seemed to write in a fine, full sky, instead of the blue leaves of ledgers.

After many years that old irresponsible gayety had come over me again. This time I was in their city. Somewhere in those narrow streets they were walking. Out of one of those green shuttered windows they might be looking. They might be talking in one of those cafés. Perhaps he was Filippo. Or he. Or that one. Or, if not Filippo, then Ricciotti. Filippo, then Ricciotti.

And supposing Filippo were the little dozing fellow in the yellow boots. He might be. I felt almost impelled to climb down and shout across the corridors of lemons, "Are you Filippo?" Or, of course, Ricciotti.

As I pondered this I looked down to where the little man had been sitting, and I was startled to see he had gone. But, looking up, I saw he was making through the olives toward the road where three or four cabs, hot and shiny as flies, were standing. shiny as flies, were standing.

For some vague, gay reason I gave chase. He had jumped into a cab. I ran to the road, jumped into another cab and told the driver to follow him. We rumbled through the white dust, between the flat hands

of the cactus, between the dry olives and into the town.

We passed between the heavy sun-eaten masonry of
the cobbled streets. We passed the ochreous, cracking baroque statuary of mansions and churches. We passed worn fountains spurting their city water out of the mouths of lumpy angels and cherubs. The black crowd dodged us and dawdled in the sun.

us and dawdled in the sun.

The narrow streets sounded to the hard plod-trotting of horses. Cabs came out of every corner and sailed across the confused sunlight of the Quattro Canti. We rumbled off the cobbles into a dazzling asphalted piazza, and at a house there the little man's cab drew up. He paid his fare and disappeared into a courtyard.

We stopped. I gave my man five lire, and he hurried off lest I should wait for change. I ran into the courtyard, and mounted a flight of stone stairs. My little fellow was waiting at the top at a door. He had pulled the bell. The door was opening. He had one foot on the step as I ran up. He was compact, well filled. His eye-brows were short, high and deprecatory. His yellow booted feet were discreet and small. feet were discreet and small.

As he turned to me inquiringly I suddenly realized I had thought of nothing to say to him. I had been too excited to think of even an opening phrase, and this, in excited to think of even an opening phrase, and this, in the poor state of my Italian, was very necessary! His discretion and composure rebuked me. Hotly I blundered out, fishing for words:

"I was told— I thought— Are you by any chance— You are not Signor Filippo?"

He shook his head sympathetically and said, "I regret, I am not," and the door closed behind him as he stepped

As I walked across the piazza into the street that leads out past the high, dark sea to the lemon-lit valleys, it occurred to me—indeed, why had I not asked?—he might have been Ricciotti.

V. S. P.

The Week in New York

VENTURESOME dream of New York City. taken A VENTURESOME dream of New York City taken from the vantage point of what may easily have been a cow pasture in 1829, has been unearthed in the files of the New York Mirror for February of that year. Then, not, many years after Fifth Avenue was staked out for the first few blocks of its grand stretch, an extension of Fourth Avenue was being contemplated, and a writer, supported, so he said, by the opinions of many "gentlemen of the first respectability for property and standing," expressed the claim for it that it should be laid out to receive ultimately "such a combination of riches, embellishments and grandeur as might hereafter challenge a comparison with, even if it did not far surpass, any other in the world." Considering that Fourth changes to Park Avenue, and that Park Avenue now holds the city's most pretentious office buildings, and after them the greatest concentration of luxurious apartment buildings, his dream might seem to have struck with great accuracy. The elasticity of the words he used, however, appears to have carried his vision farther than it deserved, for the opinion he hazarded in measurable numbers before a possibly incredulous public today is worthy of note for its modesty. The Avenue, he urged, should be laid out for "posterity, for generations to come, for a population which is to cover the island, and which will probably number a million."

The verdict of the present age on some of its own co tributions to the arts appears to be undergoing a modifi-cation of its earlier harshness, if not a complete reversal. Both jazz and the "movies" this week gained a step or two toward full admission into the Elysian fields. The Central Park Mall, where, through the generosity of several prominent patrons of music, concerts of classical works are rendered throughout the summer by some of the best bands and orchestres in the city, is to have an the best bands and orchestres in the city, is to have an afternoon of America's ultramodern pieces tomorrow. Paul Whiteman, whose ability as a director has largely aided in giving jazz its present measure of respectability, has acceded to a request from the Mayor himself to bring his orchestra to these precincts of the statelier measures. The "movies" have gained a less famous but perhaps more insistently artistic niche. The Quill, the semiofficial organ insistently artistic niche. The Quill, the semioficial organ of Greenwich Village, where art stalks with its leanest and most determined tread, has capitulated completely to the late enemy by accepting in its columns a regular department, to be called "Kaleidoscopia." The department, it is intimated, proposes to deal sternly with the upstart, but the "movies," none the less, have been accepted in the family.

Notwithstanding the almost unimited supply of voices and ears for radio programs, the industry and all concerned have at last come face to face with the fact that and ears for radio programs, the mulstry and all concerned have at last come face to face with the fact that there is only one air. Preparations for sending out reports of the Republican and Democratic state conventions, for which conferences began this week, came immediately upon the complication that the proceedings are to be simultaneous. Both parties will hold their meetings on Sept. 27 and 28, the Democrats in the Arena at Syracuse and the Republicans in Madison Square Garden, New York. Both parties, also, as a matter of strategy, fixed their meetings so as to send their nominations to the state capital at the last minute required by law, so that the other could not pick its candidate accordingly; and both, consequently, will be hurried and have to crowd in their important events. The Radio Corporation of America has undertaken to radiocast both events, which it has the mechanical facilities to do readily enough; but the fact that its patrons will almost certainly want to hear the speeches and votee of the one as much as the other, has necessitated an effort to obtain enough party harmony to "starger" the proceedings so "at each important event may have the air and the audience in peace.

Defeat, honorably but thorough, attended the efforts of the municipal dock master at the Battery, known to his neighborhood as "Buck" MeNeil, to appear as a different kind of benefactor from usual. Habitually, he indulges in rescuing persons from the waters off the Battery to such an extent that his fame has apread throughout the Port Department. Thirty-six individuals have been brought in by him alone, and forty more with his sid. This week, however, he ventured forth in a new capacity as dispenser of free ice cream to the youngsters of Battery

Park and Bowling Green. One hundred quarts were supplied by a broker in the district, H. H. Barnes, in the expectation that they would keep the local youth occupied for a reasonable time, and Mr. McNeil was asked to officiate at the ladle. The ceremonies began sedately enough, but the news had spread too far. Most of the youngsters brought guests, and by the time 500 had gathered a wave settled in on Mr. McNeil that took the distribution in hand and left him, almost before he knew it, scraping fruitlessly at a row of empty cans. His record for valor was in no way impaired, however, especially as with Mr. Barnes again at the checkbook, he will be back next week, this time with 1000 quarts.

A cargo of the latest Paris style creations, interspersed with a few pianos and a motorcycle, has been received by the natives of Watlin Island, in the Bahamas, with a welcome not at all lessened by the fact that the delivery was quite unintentional. The British steamer Port Kembla, the crew of which, with the exception of a few of its members left on board to guard her, arrived in New York this week, grounded on a coral reef off the island, necessitating the jettisoning of much of the cargo in an effort to get her afloat again. The visit was received with great interest and apparent satisfaction by the colored natives, who, according to the tales told by the crew on their arrival here, paddled out to the ship and watched the boxes go splashing into the sea with curious eyes until invited to come aboard and help. They paddled box after invited to come aboard and help. They paddled box after box ashore and promptly outfitted themselves in nonde-script ensembles of lingerie. One of the pianos was put to reasonably accurate use, also, but the motorcycle, at last reports, was still baffling the most intensive exam-

Justice underwent a quick but none the less effective Justice underwent a quick but none the less effective muster in one of the environs of New York the other day when a minor infraction of the law called for discipline at Bar Beach, Long Island. The local heir to the "keepers of the King's conscience," Andrew Westervelt, justice of the peace, of Roslyn, having put away his more austere habiliments in favor of a bathing suit, was enjoying a care-free moment when the problem calling for his official wisdom arose. The culprit was accordingly haled out on the sands in the best Alice-in-Wonderland manner, with a colorful array of spectators' bathing suits furnishing the setting. The testimony being heard, the defendant examined, and the fine assessed, the court and its attendants resumed their interrupted swim.

The Coal Problem in Great Britain

To the Editor of THE CHRISTIAN SCIENCE MONITOR: The British public is just about tired of being told that the expenses of getting coal are, in the case of almost every pit, greater than the price obtainable for it. Never is a word forthcoming about why the working expenses

are so high.

Now let us see where all the running expenses go. What proportion goes to the man who actually does the hewing of the coal half a mile below the surface of the earth, sometimes in constricted galleries where movement is an agony of effort?

The amount paid to the miner for hewing and loading

sometimes in constricted galleries where movement is an agony of effort?

The amount paid to the miner for hewing and loading the coal into tubs and pushing them to the "pass-by" was, roughly, three shillings per ton. What the public wants to know is, What becomes of the fifty-seven shillings which represents the difference between the price of a ton of coal to the consumer and the miner's commission on this ton which he has labored so hard to earn?

What the public is determined to know is whether or not the channels into which this fifty-seven shillings is diverted are as important to the industry as the miner is. Common humanity, uninfluenced by the spurious sanctity of financial interest, will see to it that the claims of royalty owners, directors with princely salaries, and shareholders, not to mention coal factors and merchants, take second pir to the claims of the man who does the actual work of raising the coal.

Heckington, Lincolnshire, Eng.
